Personal skills and competences

Professor Valesini after his medical degree and training at the Rome University "La Sapienza", fulfilled a research fellowship at WHO Immunology Research and Training Center – Geneva (Switzerland) . He and his research group have developed new techniques for the detection of anti-phospholipid antibodies (aPL) and have carried out studies on the role of aPL in the pathogenesis of human diseases. He is also conducting research activities in rheumatoid arthritis, anti-CCP antibodies, systemic lupus erythematosus (SLE), neuro-SLE, anti-endothelial cell antibodies, Sjogren Syndrome and new treatment of autoimmune diseases with biological products. He has large experience on clinical studies (performed according to GCP guidelines) carried out using new biological drugs for the treatment of rheumatic diseases. He has authored more than 400 articles and book chapters in international scientific journals. He serves on the editorial boards of several rheumatology journals.
