In order to **verify**, **evaluate** and **describe** international activities, Sapienza published a **report** with all its scientific achievements.

Each scientific coordinator was asked to write about the **activities of her/his area** including a list of the relevant **scientific publications**.

The document is available here:

A Framework Agreement is a legal deed of international importance which expresses a “general interest” in promoting and developing a collaboration between Sapienza University of Rome and a partner institution. It does not impose, for its very nature, any kind of limitations as regards the sector(s) of research or teaching. It has to be implemented by subsequent Protocols.
A Framework Agreement for International Cooperation is defined as a Bilateral or Multilateral Agreement stipulated by the Rector. Professors interested in a new framework agreement must submit a proposal to the International Relations Office.

After verifying compliance and motivations, the International Relations Office forwards the Agreement proposal to the University Board for International Relations. Upon approval by the Rector the Agreement is then sent to the partner institution.

Framework Agreements are often signed during Official International Meetings with foreign delegations or representatives.
