The 10-steps-path to Study in Italy

Find a programme

Before arriving in Italy, you need to choose a program among those proposed by an Italian Higher Education Institution. You can look for it directly on the institution's website or consulting the "Find a program" section. If you need information on the structure of the Italian Higher Education System or terms of institutions and qualifications needed to apply, then first have a look at the section "The Italian Higher Education Institutions".

Verify programmes entry requirements

Please note that in Italy the standard academic year starts in the fall and runs until the next September but exams can be taken until April of the following year.

Italian language skills

In Italy, most undergraduate programs are taught in Italian; several graduate programs are in English. If you have chosen a course in Italian, higher education institutions will test your linguistic ability. Even if you enroll in an English one, you might need to speak Italian to integrate in the life and culture of the country. Each institution organizes a test of Italian language proficiency.
