ONLINE PRE-SELECTION FOR INTERNATIONAL STUDENTS

Pre-selection platform (MoveIN): sapienza.gomovein.com

IMPORTANT NOTICE FOR VISA SEEKING CANDIDATES

The 2023-2024 deadline for visa seeking candidates applying to one or more programmes on the MoveIN pre-election platform is April 28, 2023 (NEW EXTENDED DEADLINE).

All other candidates will be able to submit a pre-selection application until July 28, 2023.

Please also note that possession of admission requirements is not a guarantee of admission, as certain programmes may reach capacity before the stated deadlines and we therefore encourage all candidates to apply as early as possible.

For more information, please visit www.uniroma1.it/en/admissions2023

BSc Applied Computer Science and Artificial Intelligence

DESCRIPTION:
The Bachelor’s programme in Applied Computer Science and Artificial Intelligence aims at providing learners with specific skills in artificial intelligence and the most important areas of applied computing. Graduates in Applied Computer Science and Artificial Intelligence will have a solid foundational background as well as technical training. This combination of perspectives will allow them to keep up with the most recent advancements of information and communication technology and provide a basis for a rapid career in the field. In addition, they will be able to access postgraduate programmes in the area of information technology.

The detailed exposure to the fields of applied computer science and artificial intelligence will equip graduates with: familiarity with the scientific method of investigation;

the ability to understand and make proper use of mathematical tools;
methodological knowledge and basic skills in a wide range of fields of science, information and communication technologies, including the most modern artificial intelligence techniques;
knowledge of the subject directly in English, so as to be ready to enter the international academic and industry contexts.

To this end, the first two years of the programme, which are the same for all students, cover topics that are deemed as indispensable for the cultural and technical training of the graduate, such as mathematics, physics and statistics, computer science and artificial intelligence. During the third year, in addition to completing this training, students will be able to choose courses that will characterise their profile in the most relevant areas of applied computer science. Furthermore, students will integrate their education path with subjects in economics or law. The programme also includes an internship, to be carried out either within companies in the IT sector (typically on topics such as software design and development, data analysis, artificial intelligence, systems and networks) or at the university, investigating advanced research issues in applied computer science and artificial intelligence within the academic environment.

For further information, please check out the official website of the Bachelor in Applied Computer Science and Artificial Intelligence and the FAQs page.

PRE-SELECTION

To be preselected for the degree program, a high school diploma (or equivalent qualification) earned after no less than 12 years of studies is required. Also, adequate knowledge of English is necessary. To successfully tackle the study path, basic knowledge of science and mathematics is needed, which is normally provided by the upper secondary school. Logical and comprehension skills of written texts and speech are also required, as well as mastery of expression through writing. To that end, we require that one (or more) of the following tests be successfully passed: SAT (College Board), English TOLC-I (CISIA), Italian TOLC-I or TOLC-S with the additional English section (CISIA). Documents attesting achievements that are of interest to the pre-selection should be added there – for example, the Advanced Placement (AP) tests.

CAVEAT
The candidate is required to consistently use the same email address during the whole process (i.e., for the registration to the pre-selection platform, the entry tests, all email communications, etc.). Using different email addresses could cause exclusion from the pre-selection and admission procedures.

Notice that the preselection does not suffice for the enrolment. Successful preselection applicants are required to take part in the subsequent admission procedure (the call is going to be published soon). Please make sure to carefully check every piece of information entered and every document attached before submitting them, as the replacement or addition thereof cannot be granted once the application is submitted.

We express our gratitude in advance for your collaboration and understanding!
REQUIREMENTS
The following certifications are required for an application to succeed. Notice that the absence of a requested certification may result in a rejection, so make sure to have every requested document uploaded before submitting the application.

**Minimum entry test scores** (acquired from the 1st of January 2021 on):
SAT (College Board): 960 out of 1600;
English TOLC-I (CISIA): 18 out of 50;
TOLC-I in Italian + additional English section (CISIA): 18 out of 50 + 24 out of 30;
TOLC-S in Italian + additional English section (CISIA): 18 out of 50 + 24 out of 30.

The certificate attesting the result must be in PDF format conforming to the original and show the candidate's data and score. A screenshot, a booking confirmation or a certificate of completion alone is not sufficient.

**Minimum English language requirements: Upper-intermediate (CEFR Level B2).** The following test scores are accepted:
FCE – First Certificate in English;
IELTS (academic) with a minimum score of 5.5 out of 9.0;
TOEFL (valid) with a minimum score of 72 out of 120 (internet-based);
CAE – Certificate in Advanced English;
PTE – Pearson Test of English General, Level 3 – B2 CEFR or higher (valid)
PTE – Pearson Test of English - Academic, with a minimum score of 42.

Candidates are exempted from the submission of the aforementioned test scores testifying the knowledge of English if they submit one of the following:
an International Baccalaureate (IB) in English;
a General Certificate of Education (GCE) in English;
*(only for EU applicants and non-EU citizens legally residing in Italy)* a SAT test score of at least 960 out of 1600, or an English TOLC-I (CISIA) score of at least 36 out of 50.

The certificate must be in PDF format conforming to the original and show the candidate's data and results. A screenshot, a booking confirmation or a certificate of completion alone is not sufficient.

**Minimum GPA:** 75/100

For more information:
https://acsai.di.uniroma1.it/ | https://tinyurl.com/acsai-sapienza-faq | acsai@di.uniroma1.it

Due to the volume of email messages we receive, we may not be able to respond to questions for which an answer is already available on the website.
BA Classics

DESCRIPTION: To study Classics means dealing with the people and society that have shaped Cultures, Languages and Politics in the Western world. Artefacts and texts surviving from ancient Italy, Greece and other “Provinces” of the Roman Empire (Europe, Near East, North Africa) are still substantial and relevant markers in today's physical and cultural landscapes all around Europe and Mediterranean.

The study of Ancient Greek and Latin will allow you to read and understand the voice of the Classical world: poets, historians, dramatists, scientists, mathematicians, architects, lawyers, magistrates, rulers as well as craftsmen, peasants, bakers, masons, men and women in their everyday lives.

On the other hand, archaeological tools, procedures and methods will enable you to reveal, perceive, reconstruct and communicate the material complexity of the changing structure of monuments, places and territories.

Such a way of being engaged with and looking at Classics will reveal to you the Past as a part of an historical process that influenced and continues to influence our Present. Modern questions and present challenges are the best cultural access point to an “actual” knowledge, interpretation and dissemination of Greek and Roman Culture as a part of common Human Heritage.

You will take over the methods of philology, art history, archaeology, law, philosophy and science. All this will provide you all the necessary tools to understand the past and move easily between the two cultures that merged under the insignia of the Roman Empire.

Minimum GPA: 75/100

Academic and Language Requirements:

In order to be admitted to the degree course in Classics, you must have completed a secondary school diploma or other qualification abroad, officially recognized to get access to the Italian Higher Education system (at least 12 years of schooling).

The following knowledge and skills are also required:

- good general culture;
- logical and reasoning skills;
- ability to read, understand and interpret texts;
- English language at least level B2; the following certificates will be accepted: IELTS, TOEFL iBT, TOEIC, Cambridge Assessment English, MET, Pearson English International Certificate, Oxford Test of English;
- one of the following (compulsory): SAT (College Board), with a score equal to or higher than 960/1600; English TOLC-E (also in TOLC@HOME mode), with a score equal to or higher than 13/36.

For more information: classics.sapienza@uniroma1.it
BA Global Humanities

DESCRIPTION:

“Global Humanities” is an undergraduate degree programme entirely taught in English that combines innovative teaching methodologies with participatory learning in the fields of Humanities and Social Sciences. The programme explores histories, cultures, philosophies, critical theories, politics and arts through courses in History, Anthropology, Literature, Media, Law, Human Rights, Migrations, Gender and Society, Psychology, Public Health and more. Students will be able to select courses within the programme to create flexible and career-oriented curricula. This BA course opens doors to innovative career opportunities, taking students on an exciting journey of learning and discovery in the fields of cultural institutions, public and no-profit sectors, education, media, journalism, and more. The programme partners with other organizations and institutions to offer a vibrant curriculum and matches the study of the humanities with practical experiences and mobility opportunities.

ADMISSION REQUIREMENTS:

1. (Compulsory) High School Diploma (or equivalent qualification) earned after no less than 12 years of studies.

2. (Compulsory) Admission Test: students can either take the SAT (College Board) or sit for the ENGLISH TOLC-E (CISIA).

3. (Compulsory) English Language Certificate (at least B2 level-intermediate). We will be accepting only the following certificates: IELTS, TOEFL iBT, TOEIC, Cambridge Assessment English, MET, Pearson English International Certificate, Oxford Test of English.

Kindly consider that the ENGLISH TOLC-E and the SAT are NOT equivalent to the certificate of English proficiency. Hence, students are requested to sit for either the ENGLISH TOLC-E or the SAT tests and submit their results together with a valid English Language Certificate. Both documents must be submitted on the international platform at the moment of the pre-enrollment application. Those applications devoid of the English Language Certificate and the results of the ENGLISH TOLC-E or SAT will not be considered complete and therefore they will not be accepted.

Minimum GPA: 75/100

PLEASE NOTE:

- For those students who belong to specific ‘categories of vulnerability’ (refugees; asylum seekers; displaced and/or stateless people; people coming from war-torn countries; students affected by certified/certifiable psychological, physical and/or cognitive disabilities), the Committee will assess every individual case and decide how to proceed with the language assessment.

- Those students who have been awarded a High School Diploma totally taught in English (minimum 12 years of schooling) are required to provide an official document issued by the School stating that the medium of instruction and assessment, throughout their studies, was English language. Without this document, the application will not be considered valid.

- The pre-selection letter does NOT SUFFICE for the final enrolment. However, it is compulsory to proceed to the following steps of the admission.

CAVEAT:

- Successfully pre-selected applicants are required to take part in the subsequent admission procedure.

- Applicants are strongly advised to carefully read the Call.

- Applicants need to double check every piece of information entered and every document uploaded
before submitting their final application.

❖ The replacement or addition of further documentation or the correction of names/surnames cannot be granted once the application is submitted.

❖ Applicants are required to consistently use the same email address throughout the whole process (i.e., for the registration to the pre-selection platform, the entry tests, all email communications, etc.).

The Programme’s full curriculum and the Call for Applications are available at https://corsidilaurea.uniroma1.it/en

globalhumanities.sapienza@uniroma1.it
benedetta.pancioli@uniroma1.it
BSc Sustainable Building Engineering

DESCRIPTION: The degree aims to provide the students with the knowledge and skills needed to ensure a sustainable future to both existing and new buildings. The main purpose of this degree is to update traditional, world-renowned, Italian civil engineering skills, with a particular focus on sustainable development. To achieve this target, the degree will ensure the acquisition of scientific and technological contents aimed to design, plan and manage solutions for territory and built environment sustainability, following these principles: implement lower energy demand and natural sources consumption buildings; develop passive design strategies and sustainable architecture; recovery, reuse and recycle of building materials; extend the lifetime of buildings; risk-free return of materials to the natural cycle; adopt a sustainable use of the territory; reduce urban sprawl; promote urban renewal and protection of natural areas and resources.

Academic Requirements: To be eligible for this Bachelor's degree it is mandatory to have a 12-year school Diploma or 11 years and at least 1 year of technical university enrolment.

Minimum GPA: 80/100

Minimum English Language Requirements: Upper Intermediate (CEFR Level B2)

The following test scores are accepted:

- IELTS Academic 5.5 or higher
- TOEFL iBT 80 or higher
- Cambridge B2 First or higher

For more information: sbe@uniroma1.it
MSc Architecture - Urban regeneration

DESCRIPTION:
The Master’s programme in Architecture - Urban Regeneration aims to provide a professional solution to the need of a new profile of fully-fledged architect, in cultural and professional terms and not merely formal, within the European context; a fast shaping context in which the issues of urban regeneration play a role of particular relevance, also highlighted by issues identified in the European and international urban agenda, as well as, more recently, in the national urban agenda being defined. An architect trained to investigate, configure and support urban regeneration processes, dedicated to the project as research and as a process of continuous experimentation; capable of providing adequate responses to the regeneration processes of the contemporary city at all scales and in an integrated way, combining complexity to restore perspectives of social equity, well-being and inclusion, of ecological quality, of historical-environmental sustainability, effectiveness and efficiency in the use of resources. A professional figure with a design, technical and technological competence capable of managing the emergency nature of phenomena and in territories, such as those of Italian cities, strongly characterized in terms of stratification and fragility of the various components, and yet, at the time itself, responding to the lines of action and strategic guidelines of the context and of the European Urban Agenda.

Admission to the Master’s Degree is subject to the academic requirements requested by the scientific field of study and the adequacy of personal preparation.

Academic Requirements:
at least a three-year university degree (Bachelor’s degree) in Architecture

Minimum GPA: 70/100

Minimum English Language Requirements: Upper Intermediate (CEFR Level B2)

The following test scores are accepted:

- IELTS Academic 5.5 or higher
- TOEFL iBT 80 or higher
- Cambridge B2 First or higher

For more information: architecture_urbanregeneration.lm4@uniroma1.it
MSc Architecture (Conservation)

DESCRIPTION: The Master’s degree revolves around the themes related to interventions on the existing architectural and environmental heritage. The specific objective of the Master’s degree is the achievement of a peculiar sensibility and ability related to the modalities of intervention on pre-existing architectural and environmental heritage, and to the quality design of new architecture, taking into account the relationships with the pre-existent and the historical city. The Master’s Degree builds up on the skills acquired in the bachelor’s degree, enhancing them to a specialist’s level, with particular reference to:
- the historical-critical analysis of architecture, in its broadest sense (from the single manufacture to landscape and environment);
- the ability to plan and execute, both with reference to modern architectural production and to the conservation and recovery of pre-existing structures;
- specific scientific knowledge, acquired critically.

Programme’s website: https://sites.google.com/uniroma1.it/architectureconservation/home

Academic Requirements: at least a three-year university degree (Bachelor’s degree) in Architecture.

Minimum GPA: 70/100

Minimum English Language Requirements: Upper Intermediate (CEFR Level B2)

The following test scores are accepted:

- IELTS Academic 5.5 or higher
- TOEFL IbT 72 or higher
- Cambridge B2 First or higher

For more information: architectureconservation@uniroma1.it
MSc Artificial Intelligence and Robotics

DESCRIPTION:

The aim of the Master in Artificial Intelligence and Robotics is offering students the ability to interact with professional workers in Computer Science, Artificial Intelligence, Robotics, Mechanical, Electronics and Control Engineering and with professional users of the involved application areas such as the ones which need the representation and the use of knowledge or sensorial information, automatic machine learning, real time planning, industrial robotics and services, video and pictures detection and simulation and human-computer interaction.

Career opportunities: 1. Design and realization of robotic systems for service and industrial applications, specifically for security, space, home, elderly people, medicine; 2. Design and realization of intelligent systems as knowledge management systems and big data extractions, graphic systems and animation, for cinema and videogames industries, video surveillance systems and video systems for assuring the quality of products and services.

Academic Requirements: An applicant must have an undergraduate degree in Computer Engineering, Computer Science, or other scientific disciplines

Minimum GPA: 75/100

Selected students will be invited for a Skype interview for an assessment of their skills and background. The interview will include technical questions related to the aforementioned background.

We also suggest students to take a look at the core courses of the curriculum to have a better understanding of the course requirements: https://corsidilaurea.uniroma1.it/en/corso/2021/30431/home

Minimum English Language Requirements: Upper Intermediate (CEFR Level B2)

The following test scores are accepted:

- IELTS Academic 6.0 or higher
- TOEFL iBT 80 or higher
- Cambridge B2 First or higher

Please, before sending your application, carefully read the following link, in order to be informed on the different documents we kindly request you to provide us with: https://corsidilaurea.uniroma1.it/it/node/2557737

For more information: admissions@diag.uniroma1.it
MSc Atmospheric Science and Technology for Meteorology & Climate

DESCRIPTION:

The Laurea Magistrale in Atmospheric Science and Technology for Meteorology and Climate (LMAST4MC) is a Master of Science (MSc) degree in the Physics class (LM-17), organized as an international inter-university programme, jointly proposed by the Sapienza University of Rome and University of L’Aquila. The unique feature of LMAST4MC programme is to educate master students with solid knowledge and specific skills in the domain of meteorology, climate and atmospheric science, from a physics and an engineering perspective. LMAST4MC includes fundamentals of fluid mechanics, atmospheric physics, meteorology, electromagnetics and statistical mechanics as well as satellite Earth observation, radar meteorology, atmospheric remote sensing, dynamical meteorology and climatic modelling, environmental meteorology and monitoring. The course can be completed by choosing among a wide choice of interdisciplinary subjects such as: i) urban climatology, satellite geodesy and geomatics, advanced fluid mechanics, hydro-climatology, hydrological modelling; ii) advanced electromagnetics and scattering, optoelectronic sensors, machine learning, radar image processing, engineering electromagnetics, robust statistical data analysis and modelling; ii) atmospheric sounding, lidar remote sensing, radiative transfer in atmosphere, physics of non-linear systems, space weather, hydrometeorological physics, atmospheric chemistry, physical oceanography and snow and glacier physics. Stages for carrying out the master thesis are also foreseen through agreements with regional and national meteorological services as well research institutes and companies. The program emphasizes system-related and interdisciplinary aspects aiming at forming professional expertise as meteorologist, climatologist, forecaster, atmospheric scientist, remote sensing scientist, and environmental physicist LMAST4MC is closely linked with research and innovation activities in the Italian and international job-market context related to agrometeorology, risk management, transport, climate adaptation, civil protection, renewable energy, energy management. The LMAST4MC graduate can obtain the Statement of learning curriculum conformity to the World Meteorological Organization (WMO) Recommendation 1083 “Guide to the implementation and education and training standards in meteorology and hydrology”, officially approved by the WMO National Permanent Representative.

Academic requirements: Candidates, wishing to apply to LMAST4MC, are required to have a Bachelor degree and curriculum background with the following requirements:

- Italian candidates should exhibit a Laurea in Physics (L-30) or a Laurea with at least 24 credits in MAT and 24 credits in FIS as well as (preferably) 6 credits in INF and 6 credits in CHIM.

- Foreign candidates from EU and non-EU countries should hold a BSc in Physics or a degree in a technical-scientific subject with a list of exams showing a strong background in mathematics (calculus, algebra, analysis, numerics) and physics (classical and modern) as well as in chemistry and computer programming

Minimum GPA: 75 /100

Minimum English Language Requirements: - All students must have a good knowledge of the English language preferably certified at level B2 (within Common European Framework of Reference for Languages). IELTS (International English Language Testing System) or TOEFL (Test of English as a Foreign Language) proficiency certification are welcome.

For more information: https://www.lmast.it
MSc in Biochemistry

DESCRIPTION
The Master's degree programme places Biochemistry at the very centre of the student’s educational path, making it the interpretative key of their future professional and working approach. The aim of the programme is to create a professional figure that operates at the interface between Biology and Chemistry, at the service of applied and basic research, and of the production of goods and services. The degree programme provides in-depth theoretical knowledge of the main fields of Biochemistry, Biochemical Methodologies and Biotechnologies, as well as a solid practical preparation, thanks to the presence of laboratory classes and a laboratory placement, aimed at the preparation of an experimental thesis, which can be carried out in Academia or in public and private research institutions. The educational path of the programme is divided into three main learning areas: Structural and functional biochemistry; Cellular biochemistry; Biotechnologies. It also includes a fourth Specialization Area consisting of a panel of elective courses in Advanced Biochemistry, Medical and pharmaceutical, Nutritional and Agro-industrial fields. Students will also acquire knowledge of Bioethics, Patenting, Regulation and Communication Skills. Please refer to the degree web site for further information (https://corsidilaurea.uniroma1.it/en).

CAREER OPPORTUNITIES
Roles of responsibility in the research and development area of pharmaceutical and biotech companies. Graduates in Biochemistry will also be able to apply their knowledge and skills in further studies such as specialization courses and Ph.D. programmes.

PRE-SELECTION ADMISSION REQUIREMENTS
the admission process requires a mandatory on-line pre-selection step (https://www.uniroma1.it/en/admissions2023) (please read the important information section below). In order to be pre-selected for the Master’s degree programme in Biochemistry, a three-year (minimum) Bachelor degree in the areas of Biological Sciences and Biotechnology, with a basic background in Mathematics and Physics, is required. The degree program is also open to students with a Bachelor degree in the areas of Chemistry and Physics, conditioned to the possession of a background in biological disciplines such as Cellular biology, Biochemistry and Molecular Biology. A good knowledge of spoken and written English is mandatory. Pre-selection applications will be evaluated on the basis of the presented documents and Grade Point Average (GPA). Students with a curriculum that satisfies the minimum requirements may also be interviewed to be evaluated on the basis of their motivation and knowledge of the above-mentioned disciplines.

Minimum GPA: 78/100

Minimum English Language Requirements: Upper-Intermediate (CEFR Level B2) The following test scores are accepted:
- IELTS Academic 5.5 or higher
- TOEFL ibT 80 or higher
- Cambridge B2 First or higher
- TOEIC Listening&Reading 785 or higher

Please note: the above language requirements may be waived for students holding a degree from an accredited institution where English is the main language of instruction.

IMPORTANT INFORMATION:

Notice that the pre-selection does not automatically guarantee enrollment. In order to be enrolled, pre-selected candidates (who will receive a pre-selection letter through the on-line pre-selection platform) are required to take part in a subsequent admission procedure, whose call will be announced on the Master’s Degree in Biochemistry webpage (click on “2023/2024” Biochemistry” https://corsidilaurea.uniroma1.it/en).

Candidates are required to consistently use the same email address during the whole process (i.e., for the registration to the MovelN pre-selection platform, the admission procedure, all email communications, etc.).
Concerning tuition fees, foreign students who do not have a tax domicile in Italy or declare their income abroad, will pay a fixed amount. The exact amount (differentiated between developing and non-developing countries), as well as further information and updates, are available at the Tuition and fees webpage https://www.uniroma1.it/en/pagina/tuition-fees-and-grants

We strongly recommend pre-selected candidates to start looking for grants and scholarships as soon as possible. This is of fundamental importance. Please have a look at https://www.uniroma1.it/en/pagina/scholarships and https://studyinitaly.esteri.it/en/home_borse

Please, also visit the web page of Sapienza International Students office https://www.uniroma1.it/en/office-students-international-degrees

Please make sure to carefully check every piece of information entered and every document attached before submission, as the replacement or addition of information and documents will not be possible once the application is submitted.

For further info, please write to LMBiochemistry.dsb@uniroma1.it Due to the volume of email messages we receive, we may not be able to respond to questions for which an answer is already available on the website.
MSc Business Management

DESCRIPTION: The Degree Programme (CdS) in Business Management (class LM-77) aims to provide students with the advanced knowledge and skills in management and entrepreneurship needed for effectively addressing problems of firms in a fast-changing society. The Study Plan is structured as follows: Curriculum Business Management (taught in English) Double Degree - La Sapienza Università di Roma - SRH Hochschule Berlin - Northern Illinois University – Dekalb Moscow State Institute of International Relations (MGIMO) - North Caucasus Federal University (NCFU) - Institute of Economics and Management - Stavropol Curriculum Marketing Curriculum General Management and Sustainability.

For more information please visit our website https://corsidilaurea.uniroma1.it/ and for more specific information check here https://corsidilaurea.uniroma1.it/en/corso/2022/31834/home

Academic Requirements:

First Cycle Degree (EQF Level 6): at least a three-year university degree (Bachelor or equivalent) in Economics, Business Administration with adequate academic background (overall 72 ECTS) in:
- Business (minimum 18 ECTS or equivalent credit hours) - The remaining credits must belong to at least 2 of the following areas:
  - Economics;
  - Mathematics/Statistics;
  - Quantitative Analysis (e.g. Informatics);
  - Law.
Applicants are eligible if First Cycle Degree and language proficiency comply with the above mentioned minimum curricular requirements.

Minimum GPA: 80/100

Minimum English Language Requirements:
The following test scores are accepted:

- IELTS Academic IELTS (academic) with a minimum score of 6.5 out of 9.0;
- TOEFL iBT 80 or higher
- FCE First Certificate in English
- Cambridge B2 First or higher
- TOEIC (Listening/Reading 785; Speaking 160, Writing 150 - all 4 skills required)

For more information: internationalstudents-eco@uniroma1.it
MSc Chemical Engineering

DESCRIPTION: The curriculum “Chemical Engineering for Innovative Processes & Products” of the MSc Chemical Engineering provides the student with a solid preparation and specialized knowledge in the fundamental theoretical and industrial aspects of chemical processes and operations and of materials technology. The particular focus is on micro/nano-scale aspects and on reduced environmental impact in the different application areas of (i) design, management and control of innovative industrial processes and plants; (ii) design and management of industrial processes for the sustainable production and processing of traditional and innovative materials; (iii) management of pollution prevention, environmental protection, and safety in process plants where substances are handled or produced.

Academic Requirements:
Bachelor's Degree in Chemical Engineering; The Bachelor degree must include at least a minimum number of credits (for non EU students 1 ECTS = 10 hours of lectures) in the following subjects: a) not less than 42 ECTS in Basic Scientific subjects (Mathematics, Chemistry, Physics and Computer science); b) not less than 42 ECTS in Chemical engineering subjects (such as Materials engineering, Metallurgy, Thermodynamics, Transport phenomena, Chemical plants, Process control, Applied and Industrial chemistry, etc); c) not less than 15 ECTS in industrial engineering (such as Fluid mechanics, Applied Mechanics, Electricity, Machinery, etc.).
GRE/GATE in Chemical Engineering >75% (preferred)

Minimum GPA: 75/100

Minimum English Language Requirements: Upper Intermediate (CEFR Level B2).
The following test scores are accepted:

- IELTS Academic 5.5 or higher
- TOEFL iBT 80 or higher
- Cambridge B2 First or higher
- TOEIC Listening&Reading 785 or higher

Declaration of attendance of Bachelors given in English by non-English-native candidates will not be accepted as English proficiency certification.

For more information: master.chemicalengineering@uniroma1.it
MSc Clinical Psychosexology

DESCRIPTION: The master’s degree course, in short, has the task to train, for the first time in the Italian university system, clinical psychologists and sexologists. The graduated student, in particular, will have specific competences in managing the individual, the dyad, the family, up to the social and cultural macro area. The Master Degree in Clinical Psychosexology includes various areas such as: research, evaluation, diagnosis and intervention to which psychological and medical disciplines such as psycho-sexology, dynamic psychology, clinical psychology, evolutionary psychopathology contribute theoretically and methodologically, medical sexology, forensic psychology and the history and sociology of sexual mores.

Academic Requirements: Bachelor’s Degree in Psychology

Minimum GPA: 75/100

Minimum English Language Requirements: Upper Intermediate (CEFR Level B2)

The following test scores are accepted:

- IELTS Academic 5.5 or higher
- TOEFL Ibt 80 or higher
- Cambridge B2 First or higher
- TOEIC Listening&Reading 785 or higher

For more information: clinical.psychosexology@uniroma1.it
MSc Cognitive Neuroscience

DESCRIPTION: The master in Cognitive Neuroscience is particularly suited to students interested in understanding the neural correlates of the cognitive processes as well as the relationship between the development of the mind and the brain. The aim is to train students with a psychology major (BA) with the perspectives from cognitive neuroscience, cognitive psychology and developmental neuroscience as well as hands-on training in research methods. The course trains students to carry out research in cognitive neuroscience offering high-level teaching, space to practical supervised activity in didactic and professional labs and the possibility to carry out an experimental thesis at the research labs of our Department and in partner institutions. The master features twelve courses that offer a high level of specific preparation (90 ECTS) and practical training activities for a total of 120 ECTS. The Master course is open to a maximum of 40 students per year.

PLEASE NOTE THAT: In order to be considered in the pre-selection you need to enroll in Infostud Sapienza, and keep the registration number issued by the system, it will be essential for the other stages of the procedure. You may receive a pre-selection letter that you will be able to use for VISA purposes. The pre-acceptance does not represent full acceptance that is strictly based on your position in the ranking. Upon publication of the call you’ll need to pay a tax fee of 35 euros in order to get in to the selection process and eventually be listed in the rankings.

Academic Requirements: Bachelor Degree in Psychology or a Bachelor Degree with a major in psychology with a minimum of 90 ECTS in psychological disciplines (students are required to hold the degree by September 1st 2020)
Minimum GPA: 75/100

Minimum English Language Requirements: Upper Intermediate (CEFR Level B2)

The following test scores are accepted:

- IELTS Academic 5.5 or higher
- TOEFL iBT 80 or higher
- Cambridge B2 First or higher
- TOEIC Listening&Reading 785 or higher

For more information: cognitiveneuroscience.lm51@uniroma1.it
MSc Computer Science

DESCRIPTION
Our Master's program in Computer Science (LM-18) provides a broad grounding in Computer Science and in-depth knowledge of several emerging application areas. The teaching language is English for the whole program. Students can choose one of five curricula: ARTIFICIAL INTELLIGENCE aimed at preparing innovators and researchers in artificial intelligence, machine learning, and their applications. INFORMATION SCIENCE AND APPLICATIONS provides students with a strong foundation in theoretical Computer Science. MULTIMEDIA COMPUTING AND INTERACTION provides students with knowledge of the fundamentals, methodologies, and techniques for processing and interacting with multimedia content, i.e., graphics, text, audio, and video content. NETWORKS AND SECURITY aimed at preparing future innovators and researchers in systems, networking, cryptography, and security. SOFTWARE ENGINEERING introduces students to adequate methodologies for the design and analysis of complex and critical software systems.

Caveat
The candidate is required to consistently use the same email address during the whole process (i.e., for the registration to the pre-selection platform, all email communications, etc.). Using different email addresses could cause exclusion from the pre-selection and admission procedures.

Notice that the preselection does not suffice for the enrolment. Successful preselection applicants are required to take part in the subsequent admission procedure (the call is going to be published soon). Please make sure to carefully check every piece of information entered and every document attached before submitting them, as the replacement or addition thereof cannot be granted once the application is submitted.

We express our gratitude in advance for your collaboration and understanding!

Academic Requirements: Bachelor’s degree in Computer Science, Computer Science Engineering, or equivalents

Minimum GPA: 75/100

Minimum English Language Requirements: Upper Intermediate (CEFR Level B2)

The following test scores are accepted:

- IELTS Academic 5.5 or higher
- TOEFL iBT 80 or higher
- Cambridge B2 First or higher
- TOEIC Listening&Reading 785 or higher

To have a better understanding of the courses available and the competencies required, we also suggest having a look at the master program web portal (a.y. 2022/23 edition) https://corsidilaurea.uniroma1.it/en/corso/2022/29932/home

For more information: info-computer-science-degrees@di.uniroma1.it
MSc Control Engineering

DESCRIPTION: The Master in Control Engineering introduces the student to the basic methodologies of Automatic Control such as: - modeling and identification of dynamic systems; - measurement processing and on-line filtering of sensor data; - use of feedback to stabilize the behavior of a process and optimize its performance; - integrated design of automatic control systems. These methods are pervasive in various engineering fields and necessary in dealing with advanced applications in industrial and service automation. The master-level formation is based on a general approach to the analysis and design of complex automatic control systems and teaches the technical know-how for implementing such automatic systems, keeping into account the nature of the target applications. It provides the tools for describing and understanding the main issues in engineering problems, develops the capacities for designing and running automatic systems and processes, and enhances the skills in scientific innovation.

Academic Requirements: The Master of Science in Control Engineering typically admits students having a three- year (or four-year) Bachelor degree with a background in the areas of information engineering, industrial and automation engineering, computer science, mathematics, or physics. All students must have a good knowledge of spoken and written English. Application documents will be evaluated first. Students with a curriculum that satisfies minimum requirements on basic (bachelor) education in the technical and scientific domains of Systems Theory, Automatic Control, and Automation Engineering will be interviewed for admission. A document available on the course web site provides more detailed information about basic concepts and methods on Linear Systems analysis and Feedback Control design that are assumed to be known by the candidate in order to be admitted to the master course. Candidates will be evaluated by technical questions on these concepts and methods during the interview.

Minimum GPA: 75/100

Minimum English Language Requirements: Upper Intermediate (CEFR Level B2) The following test scores are accepted:

- IELTS Academic 5.5 or higher
- TOEFL iBT 80 or higher
- Cambridge B2 First or higher
- TOEIC Listening&Reading 785 or higher

Please, before sending your application, carefully read the following link: http://www.diag.uniroma1.it/~automatica/?p=procedure/ammissione&l=en

For more information: admissions@diag.uniroma1.it
MA Cultural Heritage in the Near and Middle East, and Africa

DESCRIPTION: The Master's degree course 'Cultural Heritage in the Near and Middle East, and in Africa' offers a unique training opportunity for those wishing to specialise in both the study of history and the conservation of cultural heritage of western Asia and northern and eastern Africa. Our teaching methods are designed to give a solid theoretical and methodological grounding as well as practical experience and combine classes and seminars with thematic workshops and specialised hands-on practical training.

Taught modules are all characterised by strong interdisciplinarity and encompass the fields of archaeology, epigraphy, history, history of art, philology, and literary studies, paired with cultural anthropology and history of religions. Hands-on activities, implemented both in Italy and in the many countries where Sapienza's prestigious archaeological missions are active, will provide students with skills in numerous areas of expertise (e.g. stratigraphic excavation, survey, conservation, the study of material culture, interpretation of historical sources, museum planning and developing, valorisation projects).

Graduates from the MA will develop specific knowledge and professional skills that are required for a successful career in national and international organisations that promote heritage enhancement projects in the area and will grant an excellent foundation for those wishing to continue to further degree programmes.

Academic Requirements:

Bachelor's Degree (three-year or equivalent) with a background in archaeology, or, alternatively, in epigraphy, history of art, philology and cultural anthropology, Museology, Cultural Heritage Law. Applicants should have a basic knowledge of archaeological sciences, history, languages, and ancient literature of the Mediterranean and Western Asia territories, including Egypt and North and East Africa.

Graduates/Candidates must have acquired at least:
84 CFU (or equivalent credit hours) in Archaeology, History, Philology;
6 CFU (or equivalent credit hours) in one or more of the following disciplines: Biology, Chemistry, Physics, Geography, Architecture, Engineering, Computer Science, Law.

CFU is the Italian equivalent of ECTS (European Credit Transfer System): 1 CFU = 30 hours of study. 1 CFU roughly corresponds to 7 teaching hours, therefore a standard semester course of 42 teaching hours corresponds to 6 CFU.

For International candidates holding degrees achieved in EU or non-EU countries, the correspondence between academic qualifications and the relative disciplines will be reconstructed by the Admission Committee when evaluating the university curriculum.

Admission is dependent upon possession of curricular requirements.

Minimum GPA: 75/100

Minimum English Language Requirements: Upper Intermediate (CEFR Level B2) The following test scores are accepted:

- IELTS Academic 5.5 or higher
- TOEFL iBT 80 or higher
- Cambridge B2 First or higher
- TOEIC Listening&Reading 785 or higher

For more information: nearandmiddleeast@uniroma1.it
MSc Cybersecurity

DESCRIPTION: The Laurea Magistrale in Cybersecurity of the Sapienza University of Rome is characterized by an interdisciplinary offering that collects contributions from computer science, engineering, statistics, legal-economic and organizational sciences, along with specific knowledge of protection against cyber attacks in the main application domains. This master's degree provides English-only teaching to facilitate integration into an international work environment and the participation of international students and professors. The MSc in Cybersecurity provides three study plans designed to train professionals with different skills, namely: the Software plan, the Processes and Governance plan, and the Infrastructures and Systems plan. This master's degree is a 2-year, 120 ECTS program ending with developing and discussing a final thesis project.

Academic Requirements: Bachelor's Degree in Computer Science, Computer Engineering, Mathematics, Physics, Statistics, Telecommunication Engineering, or a related field. This Master Degree takes for granted the subjects and contents covered during a standard Italian Bachelor's Degree in Computer Science and offers an in-depth technical analysis aimed at training experts in Cybersecurity. Therefore, a technological core is essential regardless of the orientation chosen within the Study Plan.

Minimum GPA: 75/100

Minimum English Language Requirements: Upper Intermediate (CEFR Level B2)

The following test scores are accepted:

- IELTS Academic 5.5 or higher
- TOEFL iBT 80 or higher
- Cambridge B2 First or higher
- TOEIC Listening&Reading 785 or higher

For more information: cybersecurity_info@uniroma1.it
MSc Data Science

DESCRIPTION: The remarkable increase in the volume and complexity of available data and new technologies that have been developed to process them requires a combined multi-disciplinary approach to design an overall strategy aimed at transforming data into useful information. Key ingredients to develop a successful strategy are data manipulation and visualization, large scale computing, statistical modeling, learning techniques, algorithmic thinking. Laurea Magistrale in Data Science is a joint I3S Faculty initiative combining the expertise of four Departments:
Department of Computer Science (DI)
Department of Computer, Control and Management Engineering (DIAG)
Information Engineering, Electronics and Telecommunications (DIET)
Statistics (DSS)

This Master's program provides a solid and modern preparation to understand and manage the multi-facet aspects of carrying out a complete data analysis, including acquisition, management, and statistical analysis.

Curricular requirements: a 3-year degree or university diploma, or other adequate educational qualifications gained abroad, in the fields of Computer Science, Computer Engineering, Statistics, Mathematics, Physics, Engineering, Economic Science or a related field.

Personal preparation: The Adequate personal preparation (APP) addresses two aspects:
(APP-a) Results and relevance of previous career;
(APP-b) Knowledge regarding Mathematics, Probability and Computer Science.

The following will be taken into account for the verification of the requirements (APP-a)
- the final grade obtained in the Bachelor's degree and the relative average grade point paying particular attention to the grades obtained in the area of Mathematics, Probability and Computer Science.
- the relevance of the Bachelor's degree curriculum.

The verification of adequate preparation with regard to Mathematics, Probability and Computer Science (APP-b) will examine the knowledge acquired on the following subjects:
(APP-b1). Mathematics: Differential and integral calculus for functions of one or more real variables; basic notions of linear algebra and analytical geometry in the plane
(APP-b2). Probability: Random variables, distributions and expected values; main classes of parametric distributions of random variables; convergence of sequences of random variables.
(APP-b3). Computer Science: Principles of programming, object-oriented design; at least one programming language among C, C++, C#, Java, Python.

Students passing (APP-a) evaluation will have an on-line test to verify the (APP-b) mentioned knowledge and then through an online interview with a Committee.

Minimum GPA: 75/100

The submission of a GRE certificate is strongly recommended and will constitute a positive element in the evaluation for admission to the programme.

Minimum English Language Requirements: Upper Intermediate (CEFR Level B2)

The following test scores are accepted:
- IELTS Academic 5.5 or higher
- TOEFL iBT 80 or higher
- Cambridge B2 First or higher
- TOEIC Listening&Reading 785 or higher

For more information: admissiondatascience@diag.uniroma1.it
**MSc Design, Multimedia and Visual Communication**

**DESCRIPTION:**

The two-year MA in Design, Multimedia and Visual Communication (LM-12), established in the A.Y. 2007/2008, is a second level university program in the field of Design that aims to train a designer able to think up and plan communication artifacts’ contents, aesthetic and technological aspects in both analog and digital environments.

During the two-year program students acquire skills, tools and methodologies relevant to the design of communication artifacts in the fields of design thinking, communication studies, typography, graphics, advertising, multimedia, interaction design, performing and exhibit design.

The training activity concerns the following main themes: corporate identity (i.e. the institutional and corporate image and its close relationship with design of services), type design, photography, editorial graphics, the design of information and communication systems (infographics), public utility communication; multimedia and interactive design, gaming, video editing, kinetic graphics, new media design, performing arts and exhibit design.

The study plan offers two programs, respectively taught in Italian and English, and includes eight integrated studios: three concerning different aspects of Visual and Graphic Design, three concerning Multimedia Design fields, one Exhibit Design studio and a Final studio. Other courses concern disciplines such as: photography, video editing, theories and practices of the graphic, electronic and digital arts, storytelling, digital education, sociology of cultural processes, entertainment artifacts design and computer engineering.

Graduate students will be able to work both as freelancers, and as art directors, executives or team leaders in design studios, companies, communication agencies or any other workspace in which visual communication is an integral part of the corporate mission. Graduates can also continue their training during the Ph.D. course.

**Academic Requirements:** students graduated in Italy with Bachelor's Degree in Design (both Italian citizens, EU citizens and non- EU citizens residing in Italy). Students graduated from Bachelor's degree other than Design can apply for the program as long as they possess at least 40 ECTS in following disciplinary sectors: ICAR / 13; ICAR / 14, ICAR / 16; ICAR / 17; ING-INF / 05; SPS / 08; L-ART / 05; L-ART / 06; SECS-P / 08.

For International candidates holding degrees achieved in EU or non-EU countries, the correspondence between academic qualifications and with the relative disciplines will be reconstructed by the commission when evaluating the university curriculum.

The evaluation will be according to the final grade of the Bachelor Degree, the university curriculum, other certificates of specialization courses (if any), and the portfolio about the skills and activities in the field of communication, visual and multimedia Design would benefit the evaluation of your cv and increase your score.

**Minimum GPA:** 75/100

**Minimum English Language Requirements:** Upper Intermediate (CEFR Level B2)

**For more information:** carlo.martino@uniroma1.it
MSc Development and International Cooperation Sciences

DESCRIPTION: The interfaculty MSc programme in Development and International Cooperation provides students with the competences necessary to analyze institutional and cultural factors and to plan and manage cooperation initiatives to aid developing countries.

The programme, which has been developed by the Faculties of Political Science, Sociology, Communications, and Humanities, provides students with interdisciplinary knowledge and useful tools to analyse and comprehend the context they will find in developing countries, as well as to manage peace projects and international development cooperation programs.

The programme also provides students with advanced skills that will allow them to:
Design, develop, implement and direct integrated cooperation programmes and development projects;
Monitor and assess projects and programmes;
Use communication and information management tools

Academic Requirements:
During your bachelors programme you must have taken at least one or two exams in Economics*:
During your bachelors programme you must have taken at least one or two exams in Law*:
During your bachelors programme you must have taken at least one or two exams in Social Sciences*.

*Please note: The assessment is based on the number of the credits, not only on the number of the exams.

Minimum GPA: 80/100

Minimum English Language Requirements: Upper Intermediate (CEFR Level B2)

The following test scores are accepted:
- IELTS Academic 5.5 or higher
- TOEFL iBT 80 or higher
- Cambridge B2 First or higher
- TOEIC Listening&Reading 785 or higher

For more information: magistralicoris@uniroma1.it
MSc Economics

DESCRIPTION: The Master of Science Program in Economics at Sapienza University of Rome provides students with a sound knowledge of economic analysis and quantitative methods for economics. Graduates will be able to interpret the economic mechanisms and understand the behavior and the decision process of economic agents and financial institutions. They will also develop the ability to analyze the functioning of markets and forecast the future evolution of economic and financial variables. Interdisciplinarity and the international orientation of the Program are indeed among its strengths. As for the work opportunities, they are largely focused on jobs with a strong emphasis on economic and financial analysis. Typically, career opportunities for our graduates in Economics are available at policy institutions, international organizations, financial and non-financial corporations, consulting firms, research centers and regulatory authorities.

For more information please visit our website https://corsidilaurea.uniroma1.it/ and for more specific information check here https://corsidilaurea.uniroma1.it/en/corso/2020/30822/home

MINIMUM ADMISSION REQUIREMENTS:
First Cycle Degree (EQF Level 6: at least a three-year university degree (Bachelor or equivalent) in Economics, Business Administration, Finance with adequate academic background (overall 90 ECTS) in:
  • Economics (macroeconomics, microeconomics and similar subjects, excluding, however, business subjects) (minimum 18 ECTS credits);
  • The remaining credits must belong to the following areas:
    • Business;
    • Mathematics/Statistics;
    • Quantitative Analysis (e.g. Informatics);
    • Law.
Applicants are eligible if First Cycle Degree and language proficiency comply with the above mentioned minimum curricular requirements.

Minimum GPA: 75/100

Minimum English Language Requirements:
The following test scores are accepted:
  • IELTS Academic IELTS (academic) with a minimum score of 5.5 out of 9.0;
  • TOEFL iBT 70 or higher
  • FCE First Certificate in English
  • Cambridge B2 First or higher
  • TOEIC Listening&Reading 785 or higher

Please note: the above requirements may be waived for students holding a degree from an accredited institution where English is the main language of instruction.

For more information: internationalstudents-eco@uniroma1.it
MSc Economics and Communication for Management and Innovation

DESCRIPTION: Economics and communication for management and innovation is a multi-disciplinary programme specifically based on the needs of enterprises and Confindustria, the main Italian Association of Entrepreneurs. The programme is based on enterprise science, digital communications and applied computer science. The objective is to train professionals who will be able to meet the multi-disciplinary requirements of modern enterprise, extending the traditional curricula of single-faculty programmes and moulding economics, computer science and social sciences. The programme will provide students with skills in enterprise communications, innovation process management skills, and enterprise strategies and tools for innovative and international contexts.

For more information please visit our website https://corsidilaurea.uniroma1.it/ and for more specific information check here https://corsidilaurea.uniroma1.it/en/corso/2022/31296/home

MINIMUM ADMISSION REQUIREMENTS:
First Cycle Degree at least a three-year Bachelor degree (EQF Level 6) in Economics, Business Administration or equivalent with adequate academic background (overall 72 ECTS) in:
• Business (minimum 18 ECTS or equivalent credit hours);
• Economics;
• Mathematics/Statistics;
• Quantitative Analysis (e.g. Informatics);
• Law.
Applicants are eligible if First Cycle Qualification and language proficiency comply with the above mentioned minimum curricular requirements.

Minimum GPA: 80/100

Minimum English Language Requirements:
The following test scores are accepted:
• IELTS Academic IELTS (academic) with a minimum score of 5.5 out of 9.0;
• TOEFL iBT 70 or higher
• FCE First Certificate in English
• Cambridge B2 First or higher
• TOEIC Listening&Reading 785 or higher

For more information: internationalstudents-eco@uniroma1.it
MSc Electrical Engineering

**DESCRIPTION:** The MSc programme in Electrical Engineering provides advanced scientific and professional skills in this specific field, covering also the following topics:
- Production, transmission and distribution electrical systems
- Renewable energy sources (RES) and electrical storage
- Electric mobility (e-mobility)
- Smart grids
- Electrical markets
- Power quality, business continuity and electrical resilience
- LV, MV, HV installations and components

The MSc programme in Electrical Engineering is designed to train highly qualified electrical engineers able to work both in SME and in large organizations. Graduates will also be able to apply for PhD or other research positions in universities and private sectors. Available statistics show that the employment rate in this field is greater than 98%.

For further information on this programme, please visit: https://corsidilaurea.uniroma1.it/en/corso/2020/30843/home

**Academic Requirements:** Bachelor’s degree in Electrical or Energy Engineering or equivalent

**Minimum GPA:** 75/100

**Minimum English Language Requirements:** Upper-Intermediate (CEFR Level B2)

The following test scores are accepted:
- **IELTS Academic** 5.5 or higher
- **TOEFL iBT** 80 or higher
- **Cambridge B2 First** or higher
- **TOEIC Listening&Reading** 785 or higher

For more information: ee_admissions@uniroma1.it; francesca.maradei@uniroma1.it
MSc Electronics Engineering

DESCRIPTION: The Master Degree in Electronics Engineering Programme (class LM-29) provides students with specific skills related to electronic digital systems, integrated components, microwave circuits, radiofrequency systems and advanced communications together with multidisciplinary laboratory competences and mathematical advanced topics. A set of subjects going from discrete circuits to machine learning, from advanced antennas to electromagnetic scattering, from circuit design to embedded systems, from nanoelectronics to power electronics, from optoelectronics to lasers and accelerators, from environmental electronics to Earth observation, from bioengineering to wireless communication systems can complete the MDEE. External stages for carrying out the master thesis are also foreseen. The programme emphasises system-related and interdisciplinary aspects and is closely linked with research and innovation activities in the Italian and international job-market context.

Academic Requirements: The MDEE selection process: - requires the general documents about the university MDEE of the candidate including the list of exams with their subjects, the corresponding grades, the Bachelor final thesis showing a strong background in mathematics (calculus, algebra, analysis) and physics (classical and modern), chemistry and electrical measurements, computer programming, analog and digital electronics, electromagnetic fields and antennas, communication theory and engineering and control theory; The submission of the following documents is strongly recommended and will constitute a positive element in the evaluation for admission to the programme, such as CGPA, GRE, and GATE, will be also taken into consideration.

Minimum GPA: 80/100
The MDEE Selection Committee may request an interview with the prospective students via internet

Minimum English Language Requirements: Upper Intermediate (CEFR Level B2)
The following test scores are accepted:
- IELTS Academic 5.5 or higher
- TOEFL iBT 80 or higher
- Cambridge B2 First or higher
- TOEIC Listening&Reading 785 or higher

For more information: ingeniera_elettronica.lm29@uniroma1.it
MSc Energy Engineering

DESCRIPTION: The Master’s Degree in Energy Engineering aims at providing a specific education on techniques and systems involved in energy generation and conversion. Specifically, arguments related to technological solutions, conversion, safety, management and control of plants powered by fossil fuel, renewable energy sources and nuclear sources.

Academic Requirements:
VERY GOOD FINAL EVALUATION (minimum required CGPA 3.2 over 4)
VERY GOOD BASIC MATHS
VERY GOOD BASIC PHYSICS
VERY GOOD BASIC CHEMISTRY
EXTENDED KNOWLEDGE IN APPLIED THERMODYNAMICS
EXTENDED KNOWLEDGE IN ELECTRICITY, ELECTRICAL DEVICES, DRIVES AND GRIDS
EXTENDED KNOWLEDGE IN MECHANICAL ENGINEERING
EXTENDED KNOWLEDGE IN STRUCTURAL MECHANICS

Minimum GPA: 80/100

Minimum English Language Requirements: Upper Intermediate (CEFR Level B2)

The following test scores are accepted:

- IELTS Academic 5.5 or higher
- TOEFL iBT 80 or higher
- Cambridge B2 First or higher
- TOEIC Listening & Reading 785 or higher

For more information: giampaolo.romano@uniroma1.it
MSc Engineering in Computer Science

**DESCRIPTION:** The aim of the course is to train Computer Engineers with specific expertise both in the sector of Computer Science, focusing on software applications, and in the sectors of information processing systems and security, assessment of system performance, and optimization of information processing and network systems. The course prepares students for the following jobs:

Software analysts and engineers, able to design, develop, modify and optimize software applications based on the needs of final users; analyse data processing problems for different computing needs and develop, identify and optimize information processing systems; design, integrate and verify software employed in web applications.

Engineers for the planning and management of systems and networks: these professionals identify and optimize ad-hoc information management systems; plan and implement security measures for information systems to regulate data access and prevent unauthorized data access.

**Academic Requirements:** Applicants are expected to have a strong academic background in Computer Science. As a minimum requirement an applicant must have an undergraduate degree (e.g. Bachelor's) in Computer Engineering, Computer Science, or other scientific areas (the latter will be analyzed and approved on a case-by-case basis).

Selected students will be invited for a Skype interview for an assessment of their skills and background. The interview will include technical questions related to the aforementioned background.

We also suggest students to take a look at the core courses of the curriculum to have a better understanding of the course requirements: https://corsidilaurea.uniroma1.it/it/corso/2019/29937

**Minimum GPA:** 75/100

**Minimum English Language Requirements:** Upper Intermediate (CEFR Level B2)

The following test scores are accepted:

- IELTS Academic 6.0 or higher
- TOEFL iBT 80 or higher
- Cambridge B2 First or higher
- TOEIC Listening&Reading 785 or higher

Please, before sending your application, **carefully read the following link**, in order to be informed on the different documents we kindly request you to provide us with:

https://corsidilaurea.uniroma1.it/it/node/2557735

For more information: admissions@diag.uniroma1.it
MA English and Anglo-American Studies

DESCRIPTION: The English and Anglo-American Studies MA programme of the Faculty of Arts and Humanities provides a high degree of specialisation focusing on the Anglophone world, including language, literature and culture, as well as translation and history of the language. Additional core/subsidiary subjects include Art, Fashion, Linguistics, Philosophy, Italian, Computing for the Humanities and Comparative Literature.

Admission is dependent upon possession of entry requirements and personal competences: 84 credits in various disciplines at BA degree level, of which 54 in English and/or Anglo-American Language and Literature (24 in Language). Students, however, can enrol in single modules prior to full enrolment, so as to make up for missing credits. Students also need to have reached a B1 level in Italian before the beginning of classes.

Minimum GPA requirement: 75/100.

We strongly recommend that applicants add to their portfolio one of the following language certificates. Applications lacking a supporting certificate at C1 level may be rejected (some exemptions may apply).

- IELTS (academic) with a minimum score of 7.0;
- TOEFL (valid) with a minimum score of 95;
- CAE – Certificate in Advanced English;
- CPE – Certificate of Proficiency in English.

For more information: englishangloamericanstudies.lm37@uniroma1.it iolanda.plescia@uniroma1.it irene.ranzato@uniroma1.it
MSc Environmental Engineering for Climate Change Adaptation and Mitigation

DESCRIPTION: The Master Programme in Environmental Engineering for Climate Change Adaptation and Mitigation provides an advanced technical background for careers in environmental engineering, particularly in consultancy, planning, design and management of actions, structures and infrastructures for mitigation of and improvement in environment resilience to climate change effects.

Specific competencies of graduates include:
- methods and techniques for the identification of climate change effects and monitoring/control of environmental compartments;
- policies and international guidelines to contrast climate change;
- modelling of climate systems and their interactions with anthropic systems;
- planning, design and implementation of measures and interventions to prevent and mitigate climate change impacts;
- management of natural disasters and water scarcity associated to climate change;
- management and protection of natural resources;
- solid waste management and materials/energy recovery from residues;
- design of actions and technologies for greenhouse gas emissions.

Graduates in Environmental Engineering for Climate Change Adaptation and Mitigation will find professional career opportunities, in Europe and abroad, in:
- public authorities, institutions and control agencies
- technical services
- private companies and large enterprises
- consultancy and environmental counselling firms
- research and higher education institutions

Programme website: https://web.uniroma1.it/cdaingambientale/international/international

Academic Requirements:

The Master Programme in Environmental Engineering for Climate Change Adaptation and Mitigation welcomes students having a three-year (or four-year) Bachelor degree in science, applied science or engineering. A good knowledge of spoken and written English is required of all prospective students. A pre-application procedure is required as a first evaluation in view of admission. Students with a curriculum that satisfies minimum requirements on basic (Bachelor-degree) education in the technical and scientific domains related to environmental engineering will be pre-screened for admission. Students may also be interviewed remotely in view of the final pre-screening decision.

Minimum requirements for admission are as follows:

Minimum GPA: 75/100

Minimum English Language Requirements: Upper Intermediate (CEFR Level B2).

The following test scores are accepted:
- IELTS Academic 5.5 or higher
- TOEFL IbT 80 or higher
- Cambridge B2 First or higher
- TOEIC Listening&Reading 785 or higher

IMPORTANT NOTICE: The full admission requirements for this programme are available [here](https://web.uniroma1.it/cdaingambientale/international/international)

For more information: ingegneria_ambienteterritorio.lm35@uniroma1.it
MSc Environmental and Sustainable Building Engineering

DESCRIPTION: The Master’s Programme (second cycle – 120 ECTS) of Environmental and Sustainable Building Engineering, given in Rieti, is aimed to educate a Master Engineer aware of the goals of the Agenda for Sustainable Development released by United Nations, with a specific relationship to building engineering, such as: to develop quality, reliable, sustainable and resilient buildings and environment; to upgrade and retrofit industries to make them sustainable; to facilitate sustainable and resilient city and territory development; to reduce the number of deaths and the number of people affected by disasters, including water related disasters, water resources lack and seismic related ones, with a focus on protecting the poor people in vulnerable situations, due to, also, groundwater resources supply scarcity; to reduce the adverse pro capita environmental impact of cities, also by paying special attention to air quality and water, wastewater and solid waste management.

Academic Requirements: Bachelor's Degree in Building or Environmental Engineering

Minimum GPA: 80/100

Minimum English Language Requirements: Upper Intermediate (CEFR Level B2)

The following test scores are accepted:

- IELTS Academic 5.5 or higher
- TOEFL Ibt 80 or higher
- Cambridge B2 First or higher
- TOEIC Listening&Reading 785 or higher

For more information: sbe@uniroma1.it
MSc European Studies

DESCRIPTION: The MSc European Studies aims to train high-profile professionals who will work in the increasingly global international economic and juridical context that is being driven by the development of European integration. The programme provides students with advanced knowledge and skills concerning the methodologies, cultural aspects and professional requirements that will enable them to develop original solutions to the juridical, economic, social and historical issues that are emerging in the new European and international scenarios. The European Affairs Masters Programme provides students with two different curricula: “EU Law and Economics” and “Comparative and European Law.”

Academic Requirements: Bachelor’s in: Economics, Law, Political Sciences and similar degrees

Minimum GPA: 70/100

Minimum English Language Requirements: Upper Intermediate (CEFR Level B2)

The following test scores are accepted:

- IELTS Academic 5.5 or higher
- TOEFL iBT 80 or higher
- Cambridge B2 First or higher
- TOEIC Listening&Reading 785 or higher

MA Fashion Studies

DESCRIPTION: The Masters Programme in Fashion (LM-65) prepares students for high-level responsibilities in the world of fashion, as well as its relations with figurative arts, communications and entertainment, or for independent careers in the fashion industry and a wide range of related fields. Students acquire skills and specialist knowledge related to the development of the fashion industry, both historically and as an on-going trend, with special attention to cultural, symbolic and economic/financial factors, as well as the entrepreneurial and management skills necessary to work in this field. The Master programme uses interdisciplinary teachings involving scholars from several disciplines, including humanities, social sciences, marketing, and technical and management disciplines. Strong professional connections in the field of fashion provide students with insight into today's world of fashion.

The Master is organized in 4 semesters (2 years) and provides students with mandatory and optional courses. There are only two compulsory courses, during the first year (I semester). In each semester (and year) students are given the chance to choose between a number of selective courses within specific disciplines groups. In this way students are given a relevant freedom to specialise their learning.

Lessons are concentrated in three semesters; the last one is dedicated to the final thesis, internship experiences and Erasmus mobility. The programme provides students with more opportunities for seminars, workshops, events and hosts international scholars for special lectures about fashion.

Entry requirements (eligibility has to be verified)
Bachelor degree in the field of Fashion, Arts and Performing Arts, Architecture, spectacle and Music, History, Media and Communication, Sociology and Economics and Marketing, Textile engineering
Good proficiency in English language (reading, listening, writing B2 level (certificates like IELTS, TOEFL, Cambridge, Trinity College or TOEIC)

Minimum GPA: 75/100

The evaluation will be according to the final grade of the Bachelor's Degree, CV, and portfolio.

For more information:
masterfashionstudies@uniroma1.it; studenti-saras-fashion-studies-lm-65@uniroma1.it
MSc Finance and Insurance

DESCRIPTION: The Financial Risk and Data Analysis curriculum (entirely taught in English) of the Masters programme in Finance and Insurance aims at providing students with a wide range of advanced quantitative and programming tools together with technical instruments and a sound knowledge of the complex regulatory system which governs the financial markets. Students will acquire the knowledge and capabilities needed to analyze financial data and to use them to measure and manage risk, to make forecasts, and to build models in order to address most of the technical challenges faced by companies and institutions in the finance and insurance industry, and also in other environments. Graduates will have the skills required for a successful career in financial institutions or major corporations or to enter a PhD programme in Finance.

For further information please visit our website https://corsidilaurea.uniroma1.it/ and for more specific information check here https://corsidilaurea.uniroma1.it/en/corso/2022/30414/home

ADMISSION REQUIREMENTS:
Bachelor in Economics, Finance or other first cycle Degree with adequate academic background (overall 72 ECTS) in:
• Business and Economics (minimum 36 ECTS or equivalent credit hours);
• Mathematics and Statistics (minimum 21 ECTS or equivalent credit hours);
• Quantitative Analysis (e.g., Computer science, Programming, Econometrics, etc.);
• Law.

Applicants are eligible if First Cycle Qualification and language proficiency comply with the above mentioned minimum curricular requirements.

Minimum GPA: 80/100

Minimum English Language Requirements:
The following test scores are accepted:
• IELTS Academic IELTS (academic) with a minimum score of 5.5 out of 9.0;
• TOEFL IbT 70 or higher
• FCE First Certificate in English
• Cambridge B2 First or higher
• TOEIC Listening&Reading 785 or higher

For more information: internationalstudents-eco@uniroma1.it
MSc Genetics and Molecular Biology

DESCRIPTION:

- an in-depth knowledge of the unicellular and multicellular organisms that may be used as models to study basic mechanisms of gene expression or cell development, differentiation and transformation
- the acquisition of genetic concepts and methodologies, with special regard to those used in the genetic dissection of complex processes and to study human populations
- an in-depth knowledge of the molecular bases of the main processes involved in the regulation of nucleic acid and protein structure and function
- the knowledge of basic methodologies to study and manipulate biological macromolecules
- the ability to investigate and develop basic methodologies which may be usefully applied to biomedical and biotechnological research
- the acquisition of genetic-molecular skills for the diagnosis and treatment of genetic diseases
- the skills suitable to identify the biological processes grounding the physiopathology of organs and systems, with special regard to human beings

Academic Requirements: Bachelor’s Degree in Biological Science (L-13) or as, an alternative, Bachelor’s degree with at least 90 CFU credits comprising the following scientific fields: physics, mathematics, chemistry, and basic and characterizing biological disciplines (molecular biology, genetics and biochemistry).

Minimum GPA: 75/100

Minimum English Language Requirements: Upper Intermediate (CEFR Level B2)

The following test scores are accepted:

- IELTS Academic 5.5 or higher
- TOEFL iBT 80 or higher
- Cambridge B2 First or higher
- TOEIC Listening&Reading 785 or higher

For more information: prisca.ornaghi@uniroma1.it
MSc Health Economics

DESCRIPTION: The Master’s programme of Health Economics (LM-56) offers multidisciplinary preparation in the field of health economics and policy, health law, business management of public and private firms operating in the health industry. The Master’s programme trains economists, consultants and specialists to satisfy the increasing demand of qualified experts in the health sector. Graduates can hold senior positions in direct support of the General Director/Administrative Director/Top management of public institutions or private firms in the health sector, in national or international governmental organizations working in the field and in public or private research institutions.

Possible employers can be: -Government agencies and regulatory authorities operating in healthcare sectors - Ministries and other bodies responsible for health planning; -National and international organizations such as among others ISTAT, OECD, WHO, WORLD BANK - regulatory and programming bodies -NGOs -University. For more information please visit our website https://corsidilaurea.uniroma1.it/ and for more specific information check here https://corsidilaurea.uniroma1.it/en/corso/2022/31291/home

ADMISSION REQUIREMENTS:
In order to access the Master’s program in Health Economics is subject to the possession of the degree or university Diploma of three-year period, or other title acquired abroad and recognized as suitable. With reference to the Italian Bachelor's degree diploma, the requirement is still fulfilled if you possess a bachelor's degree of class L-18 or L-33, minimum requirements in Economic studies.

For graduates of other classes, it is required to possess at least 60 CFU acquired in the basic and characterizing SSDS provided in the tables attached to the DM. 16 March 2007 for classes 18 and 33 and/or SSD: MAT/05 MAT/06 MED/01 MED/42 ING-IND/35 (Mathematics; Information Technology; Hygiene and Epidemiology).

Moreover, the credits should respect the following minimum amount with respect to the various SSD: at least 18 CFU in SECS P01/02/03/05/06 (Economics and Econometrics); at least 18 CFU in SECS S01/03/04/05/06 (Statistics); or MAT/05 MAT/06 MED/01 MED/42 ING-IND/35 (MATHS); at least 12 CFU in SECS P07/08/09/10 (Accountancy, Business and Management).

Applicants are eligible if First Cycle Qualification and language proficiency comply with the above mentioned minimum curricular requirements.

Minimum GPA: 75/100

Minimum English Language Requirements:
The following test scores are accepted:
- IELTS Academic IELTS (academic) with a minimum score of 5.5 out of 9.0;
- TOEFL iBT 70 or higher
- FCE First Certificate in English
- Cambridge B2 First or higher
- TOEIC Listening&Reading 785 or higher

Please note: the above requirements may be waived for students holding a degree from an accredited institution where English is the main language of instruction.

For more information: internationalstudents-eco@uniroma1.it; healtheco.ecodir@uniroma1.it
MSc Landscape Architecture

DESCRIPTION: The course pursues the objective of completing a training in the field of Landscape Architecture. This integrates multidisciplinary knowledge and skills, useful at different scales of designing, also to acquire the ability to collaborate in interdisciplinary teams.

The training follows the European model, with activities to obtain skills in planning, design and management of landscapes in their natural and anthropic components; to meet human and natural, functional and aesthetic needs, based on the physical, ecological characteristics and the cultural and aesthetic values of the landscape, the potential and the critical aspects of the contexts.

The knowledge for training of the landscape architect, according to IFLA, are:

- the history and theories of landscape;
- the aesthetic theories influencing the landscape project;
- the ecology and the “nature-based solutions” for the landscape project;
- the relationships between landscape and urban transformations;
- environmental protection;
- relations between man and the environment;
- the protection, conservation, and restoration of historical landscapes;
- landscape architecture in the transformation processes at any scale;
- preparatory analyses for landscape design;
- methods and techniques of representation and communication;
- production, regulatory and management processes;
- legislation relating to landscape projects.

The Master Enrollment is subject to verification of the student's requirements and personal preparation. In short, you need a university degree or an equivalent qualification, in the fields of landscape architecture, architectural sciences, territorial, urban, environmental and landscape planning sciences, building construction sciences and techniques, agricultural and forestry sciences and techniques (including design and planning experiences), and similar.

Students must have acquired at least 90 ECTS credits in previous university programs in the disciplines listed in "Entry Requirements". It is also required the presentation of a portfolio of previous design experiences. All of these are basic and mandatory requirements for registration. Any necessary curricular integration, in terms of ECTS, must be acquired before the assessment of the student's individual preparation.

Minimum GPA: 75/100

Minimum English Language Requirements: Upper-Intermediate (CEFR Level B2)

The following test scores are accepted:

- IELTS Academic IELTS (academic) with a minimum score of 5.5 out of 9.0;
- TOEFL Ibt 70 or higher
- FCE First Certificate in English
- Cambridge B2 First or higher
- TOEIC Listening&Reading 785 or higher

For more information:
architettura_paesaggio.lm3@uniroma1.it, fabio.dicarlo@uniroma1.it
MSc Management Engineering

**DESCRIPTION:** The Masters Degree course in Management Engineering at Sapienza University aims at disseminating knowledge and competencies that integrate the technological content typical of engineering disciplines with a full understanding of the economic and management aspects of decision-making problems within organizations. For this purpose, the course analyzes and discusses methods and models for the management of complex systems, with a high interaction between the evolution of technology, the structure of markets, and the competitive strategies of companies. The course intends to provide students with the ability to play a crucial role in the strategic and operational decisions of companies. This is made possible based on the high-level skills in using effectively and efficiently the methodologies of economic analysis, optimization and simulation techniques for identifying, formulating and solving problems related to the design, organization and management of production and service systems.

**Academic Requirements:** Applicants are expected to have a strong academic background in Management Engineering. As a minimum requirement, an applicant must have an undergraduate degree (e.g. Bachelor's) in Management Engineering or related scientific areas. **Proof of English language proficiency.** The evaluation of the candidatures aims at checking that prospective students have the necessary background to successfully perform in their studies. The main elements required for admission are listed below. General background in scientific disciplines (including Mathematics and Computer Science) Specific background in: Accounting Capital Budgeting Operations Research Supply Chain Management.

Please, note that selected students may be invited for an online test to assess their skills and background: the test will include technical questions related to the aforementioned background.

**Minimum GPA:** 80/100

**Minimum English Language Requirements:** Upper Intermediate (CEFR Level B2)

The following test scores are accepted:

- IELTS Academic 6.0 or higher
- TOEFL iBT 80 or higher
- Cambridge B2 First or higher
- TOEIC Listening&Reading 785 or higher

Please, before sending your application, carefully read the following link: https://www.ingegnerigestionale.uniroma1.it/internazionalizzazione-0

For more information: admissions@diag.uniroma1.it
MSc Mechanical Engineering

DESCRIPTION: The Master of Science in Mechanical Engineering aims at training young engineers with an advanced education, providing them with skills in designing, planning and managing complex activities of research and development in an industrial environment. This goal is achieved by means of a broad training proposal based on advanced mathematics and physics, and professional expertise targeted to the solution of complex engineering problems concerning design of processes, plants, systems, devices, machines. Engineering Design professionals educated at Sapienza can work as technology specialists in a wide range of fields, including manufacturing, mechatronic, transportation (automotive, naval, aeronautical and railroad), conventional and renewable energy production, biomechanics and many others. In these settings mechanical engineers are responsible for design, testing, management, research and development services.

Admission requirements:
- Minimum GPA: 75/100
- English B2 minimum GRE (not mandatory)
- Bachelor in mechanical engineering or related

For more information: mechanicalengineering@uniroma1.it
MA Mediterranean Archaeology

DESCRIPTION:
The Master's program in Mediterranean Archaeology offers a diachronic, comprehensive overview of the deep history of the Mediterranean through a thematic approach. Historic trajectories from Prehistory and Protohistory to Classical and Medieval worlds will be analyzed embracing a perspective that opens up towards Contemporaneity. The course highly benefits from the location in the city of Rome, at the core of the Mediterranean area.
The wide range of archaeological research in Italy and abroad led by Sapienza provides students with unique opportunities for fieldworks, lab activities and stages on a Mediterranean scale. Agreements with the main national and international bodies of research, valorization and cultural heritage protection expand the spectrum of training.
The Master's course in Mediterranean Archaeology offers an innovative approach to archaeological studies that goes beyond the traditional separation of courses and curricula by periods. The focus will be the processes, cross-disciplinary themes, such as social and economic developments, cultural transformations, mobility and migrations, trade exchanges and networks, on a diachronic perspective.
The Master provides students with an advanced knowledge of state-of-the-art, theoretical background, methodologies and techniques of archaeological studies and archaeological sciences. Students will also develop skills on the protection and communication of cultural heritage on a cross-Mediterranean dimension.

Academic Requirements:
The Master in Mediterranean Archaeology typically admits students having a three-year (or four-year) Bachelor of Arts or Archaeology degree or equivalent degree (i.e. Laurea Triennale) with a background in Archaeology, Cultural Heritage, Ancient History and/or Arts. All students must have a good knowledge of spoken and written English. Application documents will be evaluated first. Students with a curriculum that satisfies minimum requirements on basic (bachelor) education in Archaeology, Ancient History, Cultural Heritage, and/or Art will be interviewed for admission. The interview is aimed at evaluating the student's CV and competences. A document available on the course web site provides more detailed information. The interview will be held either in person or on-line. Students whose background is deemed to be improved may be requested to integrate their basic knowledge by:
attending teaching modules provided by Bachelor courses in English at Sapienza/ Unitelma within the first year of the Master course;
alternatively, studying supplementary reading materials.

Minimum GPA: 75/100

Minimum English Language Requirements: Upper Intermediate (CEFR Level B2)
The following test scores are accepted:
- IELTS Academic 5.5 or higher
- TOEFL iBT 80 or higher
- Cambridge B2 First or higher
- TOEIC Listening&Reading 785 or higher

For more information:
medarch.dsa@uniroma1.it; francescaromana.stasolla@uniroma1.it
MSc Nanotechnology Engineering

DESCRIPTION:

All the details and info here: web.uniroma1.it/nano/en

The Master of Science in Nanotechnology Engineering is designed to offer an advanced scientific and professional education focused on the analysis, development, simulation and optimization of devices, materials and processes based on the use of nanotechnologies for several applications in the field of Industrial Engineering.

The Program (for a total of 120 CFU) is organized into two alternative strands:

A: most of the courses taught in Italian
B: with all the courses taught in English

Both strands include:

- 8 mandatory courses (72 CFU)
- 1 course (6 CFU) to be selected among a group of alternative teachings
- 2 free-choice courses (12 CFU)
- IV) Other activities aimed at preparing students for careers after graduation (1 CFU)
- Final Thesis preparation and defence (17 CFU)

CFU is the Italian equivalent of ECTS (European Credit Transfer System): 1 CFU = 30 hours of study (10 hours of lectures + 20 hours of homework)

Academic Requirements:
The MS in Nanotechnology Engineering aims to promote the study of advanced scientific and professional training with specific skills in engineering sciences concerning simulation, concept and design of materials, dedicated production processes to the industrial nanotechnology sector.

The access to the MS requires acquired knowledge such as found in many Degree Courses in Engineering, in all of the Degree Courses of Industrial Engineering, or in large part in the Degree Courses of Chemistry, Physics and Biotechnology.

In detail, basic knowledge in basic principles of chemistry and physics, physics of matter, algebra, geometry, mathematical analysis/statistics/physics, and probability should be pre-existing.

Moreover, some knowledge in one or more of the following fields is strongly suggested: science and technology of materials, fluid dynamics, energy and environmental systems, mechanical/thermal/electrical/electric measurements, mechanics applied to machines, electric engineering.

**Minimum GPA:** 70/100

**Minimum English Language Requirements:** Upper Intermediate (CEFR Level B2)

The following test scores are accepted:

- **IELTS Academic** 5.5 or higher
- **TOEFL IbT** 80 or higher
- **Cambridge B2 First** or higher
- **TOEIC Listening&Reading** 785 or higher

For more information: ingegneria_nanotecnologie.lm53@uniroma1.it
MSc Physics

DESCRIPTION: The master's degree program in Physics is divided into four tracks/curricula. The Fundamental Interactions track, delivered in English, aims to provide a solid mastery of high energy physics and gravity, focusing both on theoretical and experimental aspects. The Condensed Matter Physics track, delivered in English, aims instead to provide an in-depth knowledge of the theoretical and experimental aspects of condensed matter. The Biophysics track focuses on biophysics, both from a computational and an experimental point of view. The General Theoretical Physics track, on the other hand, allows the student to study theoretical topics in the field of gravitation and elementary particles (partly delivered in English, partly in Italian), statistical mechanics, and complex systems.

Academic Requirements: The student should have a BSc Physics or in a similar subject.

The student is required to have a basic knowledge of Classical Mechanics, Thermodynamics, Electromagnetism, Optics, Quantum Mechanics and Statistical Mechanics. He should have laboratory experience and knowledge of the methods of data analysis for physical sciences. Moreover, he should have some knowledge of computer programming and of the most important numerical methods used in Physics. A detailed description of the physics prerequisites is reported in the Syllabus available at https://www.phys.uniroma1.it/fisica/sites/default/files/allegati/syllabus-LM17.pdf

Students should present a CV, a motivational letter in which they clearly state which track they would like to enroll in (Fundamental Interactions; Condensed Matter Physics; Biophysics; General Theory).

Minimum GPA: 75/100

Minimum English Language Requirements: Upper Intermediate (CEFR Level B2)

The following test scores are accepted:

- IELTS Academic 5.5 or higher
- TOEFL iBT 80 or higher
- Cambridge B2 First or higher
- TOEIC Listening&Reading 785 or higher

For more information: fisica.lm17@uniroma1.it
MSc Product and Service Design

DESCRIPTION: The M.Sc. in Product and Service Design is for students who want to deepen their design skills exploring technologies, cultural languages, social issues. Our students will face creative challenges in developing products and services to improve people's lives. They will design extensively, think creatively and reflect critically. The Master Program is organized in 4 semesters. During the first semester, students will acquire innovative skills in Aesthetics, Social Communication, Smart Technologies, Digital Representation, Mechanics; In the second one, they will explore and practice the most recent Design Thinking methodologies as well as face of with the topic of Human Factors and Strategic Management; In the third one, they will understand and develop sustainable, smart and innovative production and consumption processes facing 4 different areas of application: Design for Interaction, exploring and applying smart technologies with a critical and futuristic approach; Design for Service and Social Innovation, with a human-centered and UX approach; Design for Material, with a particular attention to the biomimesis; Design for New Craft and Industry, considering the innovation of new typologies and new aesthetics. The last semester is dedicated to the final work that is a research-based activity aimed to develop a functional prototype of an innovative product and service, in collaboration with international R&D company departments or universities labs or research centres. Our graduates can spend their skills as Design Strategist at the management level for companies or new start-ups, or as Design Researcher within Research Centres or continuing their training during the Ph.D. course.

More info on https://web.uniroma1.it/msproductdesign/
https://corsidilaurea.uniroma1.it/en/corso/2021/30811/home
https://www.facebook.com/MSPDSapienza

Academic Requirements: with regard to degrees achieved in Italy (by Italian citizens, EU citizens and non-EU citizens residing in Italy) the valid degrees are in: Industrial Design (L-4 class, former L-42 class), Industrial Engineering (L-9 class, former L-10 class), Architecture (L-17 class, former L-4 class), Building Sciences and Techniques (L-23 class), Computer Science Engineering (L-8 class, former L-9 class); - with regard to degrees achieved in EU or non-EU countries, the valid degrees are in: Design (any field of Design), Industrial Engineering, Computer Science Engineering (with a specific cv in Robotics, or IoT), Architecture.

Minimum GPA: 80/100

The evaluation will be according to the final grade of the Bachelor Degree, the cv and the portfolio with regard to skills and activities in the field of Product and Service Design.

Minimum English Language Requirements: Upper Intermediate (CEFR Level B2)

The following test scores are accepted:

- IELTS Academic 5.5 or higher
- TOEFL iBT 80 or higher
- Cambridge B2 First or higher
- TOEIC Listening&Reading 785 or higher

For more information: msproductdesign@uniroma1.it
MSc Safety and Civil Protection Engineering

DESCRIPTION: The Safety Engineering for Territorial Sustainability Master’s programme trains professional figures able to operate in the safety sectors applied to territorial systems, requiring nowadays high technical and technological standards for territorial safety. The interdisciplinary approach of such topics needs specific expertise to operate in different social and work environments. The Master Degree aims to define, as a specific goal, the interaction between concepts of risk analysis and territorial resilience, in terms of the development of risk assessment models that integrate the definition of the ethical–legal —societal–economic—technical “acceptability” criterion of residual risk. The proposed goals enrich the knowledge and understanding of these concepts by means of production strategies’ analysis (in terms of goods and services) and the use of innovative technologies applied to territorial vulnerability monitoring (i.e., seismic risk evaluation). Based on the transversal nature of risk and safety concepts, applications concerning territorial vulnerability with regard to Critical Infrastructures and Complex Systems and accidents impact can be explained for the integrated risk analysis model related to the management of natural critical events. The topics of this Master’s programme allow you to provide detailed reports and develop safety procedures, recognize when safety conditions need improvement, prioritize tasks especially when handling emergency scenarios. The professional skills of a Safety Engineer include technical and analytical competence to:

- design safety systems by means formulation of dimensional and performance specifications for safety of components and system;
- evaluate safety practice and procedures for risk assessment and following legal guidelines and best practices based on verify compliance to safety acceptability criteria, laws and policies;
- conduct accident prevention analysis;
- investigate accidents and injuries to find cause and take prevention measures for further incidents;
- inspect equipment and working procedures for safe workplace conditions;
- suggest solutions, improvements and prevention steps for territorial safety issues;
- implement workplace health and safety plans to handle workers compensation claims in the event of a workplace accident.

The MSc Program (total of 120 CFU) is organized as follows:
- 9 mandatory courses (84 CFU)
- 1 course (6 CFU) to be selected among a group of alternative teachings
- 2 free-choice courses (12 CFU)
- Other activities aimed at preparing students for careers after graduation (1 CFU)
- Final Thesis preparation and defense (17 CFU)

CFU is the Italian equivalent of ECTS (European Credit Transfer System): 1 CFU = 30 hours of study

ACADEMIC REQUIREMENTS:
The access to the MSc requires knowledge found in Degree Courses both in Industrial and Civil Engineering: basic knowledge in mathematical analysis, algebra, statistics, geometry, chemistry and physics are required. Moreover, some knowledge in one or more of the following fields is suggested: energy and environmental systems, geotechnics, electric engineering, mechanics applied to machines. For more information: https://web.uniroma1.it/cdaingsicurezza/entry-requirements

Minimum GPA: 80/100

Minimum English Language Requirements: Upper Intermediate (CEFR Level B2)

The following test scores are accepted:
- IELTS Academic 5.5 or higher
- TOEFL IBT 80 or higher
- Cambridge B2 First or higher
- TOEIC Listening&Reading 785 or higher

For more information: ingegneria_sicurezza@protrciv.uniroma1.it
MSc Science and Technology for the Conservation of Cultural Heritage

DESCRIPTION: The two-year Master course in Science and Technology for the Conservation of Cultural Heritage aims to train experts in the field of cultural heritage conservation and archaeometry. At the end of the course, they will be able to detect deterioration processes, characterize materials and assess conservation protocols for all kinds of cultural heritage thanks to the knowledge of the physical, chemical, biological and structural properties of materials.

Specifically, conservation scientists will acquire the following skills:
* knowledge of the most advanced methods and techniques applicable in the diagnostic of cultural heritage;
* planning of diagnostics protocols for the conservation of cultural heritage;
* planning and organisation of science museums, science cities, science exhibitions;
* collaboration in the planning and implementation of IT systems for cultural heritage data treatment.

The multidisciplinary nature of the cultural heritage field requires various types of scientific expertise which are given during the course, while also providing a set of courses to complete the humanities education and to offer mastery of general disciplines. Training is completed through internships at the scientific labs of the university or at public and private bodies in the field.

For further information, please check out the official website (https://corsidilaurea.uniroma1.it/en/corso/2022/28702/home)

Academic requirements: A BACHELOR DEGREE in Sciences (I cycle equivalent-180 ECTS credits). Candidates must have a strong background in a wide range of Science subjects. In particular they must have attained at least: 84 ECTS credits in scientific disciplines, including Mathematics, Physics, Chemistry, Mineralogy, Biology, and Computer science 6 ECTS credits in humanities and economic disciplines (e.g., Museology, History of Restoration and Techniques of Artistic Production, and Cultural Heritage Legislation). Enrollment will be based on admission requirements, followed by scheduled interviews for all eligible students.

Minimum GPA: 75/100

Minimum English Language Requirements: Upper Intermediate (CEFR Level B2)

The following test scores are accepted:
- IELTS Academic 5.5 or higher
- TOEFL iBT 80 or higher
- Cambridge B2 First or higher
- TOEIC Listening&Reading 785 or higher

For more information: scienzebc@uniroma1.it
MSc Space and Astronautical Engineering

DESCRIPTION: The Programme provides students with specific skills in space mission planning and in analysis & design of launchers, satellites and remote metering/telemetry systems. It emphasises systems-related and interdisciplinary aspects and is linked with research/innovation activities in European aerospace industries. Graduates will be able to address complex issues requiring analysis, development, simulation and optimization in a wide range of aerospace-related topics. The Aerospace Engineering curriculum held in English is organized as follows. 1st year: knowledge is provided in major aerospace areas, Spaceflight Mechanics & Attitude Dynamics, Controls, Fluid Dynamics and Propulsion (or telecommunications and remote sensing), Structures and Space Systems. 2nd year: students select courses from a wide range of Space and Astronautical Engineering topics.

Selection is a two-steps process:
I step. Analysis of the application forms; highly qualified students will be admitted to the second step.
II step. Interview.
Rejection letters are typically sent within 7 days from application (I step) and shortly after interview (II step)

Academic requirements:

Bachelor in Aeronautical/Aerospace Engineering is preferred, other industrial engineering bachelors are accepted (especially mechanical/energy engineering). Other bachelor degrees in engineering/physics are only considered for outstanding candidates. Required background knowledge includes the following subjects: Trigonometry; Analytic geometry; Calculus; Linear algebra; Numerical methods for equation roots and quadrature; Programming skills (Matlab, Fortran, Mathematica, CAD); General Chemistry; Physics: Mechanics, Thermodynamics and Electromagnetism; Analytical Mechanics; Applied Mechanics; Materials Science; Electrical engineering; Mechanics of solids; Aerodynamics; Structural analysis; Basics of orbital mechanics; Basic concepts of thrust generation and cost in jet engines.

Minimum GPA: 75/100

Minimum English Language Requirements: Upper Intermediate (CEFR Level B2)

The following test scores are accepted:

- IELTS Academic 5.5 or higher
- TOEFL Ibt 80 or higher
- Cambridge B2 First or higher
- TOEIC Listening&Reading 785 or higher

For more information:
aerospaceengineering@uniroma1.it
MSc Statistical Methods and Applications

DESCRIPTION: SMA - Statistical Methods and Applications - is the acronym of the two-year Master of Science (corresponding to the Italian Laurea Magistrale degree) entirely taught in English and delivered by the Department of Statistical Science (DSS). DSS is the largest Department of Statistics in Italy and its faculty members enjoy an international reputation in teaching and research. DSS hosts one of the most powerful computing resources at Sapienza University of Rome. The Master programme is entirely held in English. It provides students with specific statistical skills through a suitable mix of advanced data modelling methodologies and hand-on professional training to address complex scientific and socio-economic problems.

Academic background: at least an undergraduate (Bachelor) degree with a solid foundation in Calculus, Probability and Statistics, some computing skills and basic knowledge of programming. The academic background of international students (EU and non EU) is assessed by a Prospective Student Selection Committee based on the documentation provided by the student (see below). Candidates holding a Bachelor Degree in Statistics or Actuarial Sciences are automatically accepted. Candidates possessing Bachelor Degree with at least 60 ECTS in the subject areas corresponding to the Ministerial Scientific Sectors labelled as MAT/*, INF/01 FIS/01, FIS/02, FIS/07 ING- IND/35, ING-INF/05 M-PSI/03 SECS-S/, SECS-P/ are automatically accepted.

Minimum GPA: 75/100

Minimum English Language Requirements: Upper Intermediate (CEFR Level B2)

The following test scores are accepted:

- IELTS Academic 5.5 or higher
- TOEFL iBT 80 or higher
- Cambridge B2 First or higher
- TOEIC Listening & Reading 785 or higher

The submission of a GRE certificate will constitute a positive element in the evaluation for admission to the program

For more information:
sma-dss@uniroma1.it
MSc Transport Systems Engineering

**DESCRIPTION:** The Master Degree in Transport Systems Engineering aims at providing students with high-level qualifications, so as to allow them to perform and manage a wide variety of activities connected with planning, programming, operating, monitoring transport systems and their components.

The professional skills of a Transport Systems Engineer include:
- methods to design transport systems: formulation of dimensional and performance specifications for system components;
- models for mobility of people and goods, for transport supply on multi-modal networks, for demand/supply interaction and equilibrium calculation;
- design and implementation of transport systems (technical and economic aspects), transport and mobility plans on different levels;
- on-line and off-line models for transport system operations and management;
- monitoring and ex-ante/ex-post assessment of mobility solutions from the technical, economic and environmental point of view.

**Academic Requirements:** [https://web.uniroma1.it/cdaingtrasporti/entry-requirements](https://web.uniroma1.it/cdaingtrasporti/entry-requirements)

**Minimum GPA:** 72/100

**Minimum English Language Requirements:** Upper Intermediate (CEFR Level B2)

The following test scores are accepted:
- **IELTS Academic** 5.5 or higher
- **TOEFL iBT** 80 or higher
- **Cambridge B2 First** or higher
- **TOEIC Listening&Reading** 785 or higher

LM in Architettura (Restauro)

Descrizione:

Obiettivo specifico del corso di laurea magistrale, che soddisfa gli obiettivi formativi qualificanti della classe LM-4, è il raggiungimento di una peculiare sensibilità e capacità riferite alle modalità d'intervento sul patrimonio architettonico e ambientale esistente e alla progettazione di qualità della nuova architettura, con speciale attenzione al rapporto con le preesistenze e con la città storica. Il corso di laurea magistrale proposto prevede, nei due anni di studio, l'ampliamento delle competenze, maturate nel precedente corso di laurea triennale, in termini specialistici: a) di capacità d'analisi storico-critica e storico-tecnica dell'architettura, intesa nel suo senso più ampio (dal singolo manufatto al paesaggio ed all'ambiente); b) di capacità d'intervento progettuale ed esecutivo, relativo tanto alla moderna produzione architettonica quanto al restauro e recupero dell'esistente; c) di specifiche conoscenze scientifiche, criticamente acquisite. Varietà curriculare Il curriculum del Corso di Laurea Magistrale è unico, orientato verso le tematiche legate agli interventi sul patrimonio architettonico e ambientale esistente e alla progettazione di nuove architetture. Il profilo degli studi prevede un'integrazione fra discipline progettuali, discipline umanistiche e discipline tecnico-scientifiche.

Requisiti di accesso:

- Possesso di una Laurea di primo livello di tre anni (Bachelor) o del Diploma Universitario in architettura, ingegneria civile e ambientale, ingegneria architettura, project management e scienze dell'architettura;
- Livello B2 in lingua italiana
- Portfolio

Per informazioni: architectureconservation@uniroma1.it
LM in Architettura del paesaggio

Descrizione:
Il corso intende perseguire l'obiettivo specifico di conferire il completamento di una formazione specialistica, nella quale si integrano conoscenze teorico-critiche e competenze operative e professionali nel campo della progettazione del paesaggio alle diverse scale, anche in funzione dell'acquisizione della capacità di collaborare con altre figure professionali dei settori dell'architettura, dell'ingegneria e delle scienze naturali. Il percorso formativo è articolato, analogamente a quanto già avviene nell'ambito dell'Unione Europea, in insegnamenti e attività didattiche finalizzati all'acquisizione di competenze rivolte nella pianificazione, progettazione e gestione dei processi di trasformazione del paesaggio nelle sue componenti naturali e antropiche, in grado di soddisfare esigenze umane e naturali, funzionali ed estetiche, basate sulla conoscenza dei caratteri fisici, ecologico-ambientali e socio-culturali e dei valori culturali del paesaggio, delle potenzialità e delle criticità dei contesti in cui si realizzano gli interventi, utilizzando principi estetici, funzionali e operativi basati su specifiche metodologie tecnico-scientifiche. Le conoscenze indispensabili alla formazione professionale completa dell'architetto del paesaggio definite a livello europeo (EFLA Declaration, European Foundation for Landscape Architecture, Bruxelles, aprile 1989) sono:
1 - la storia e le teorie del paesaggio, delle arti, delle tecnologie, delle scienze umane e naturali, con le loro interrelazioni;
2 - le teorie estetiche che influenzano il progetto del paesaggio;
3 - l'ecologia e l'uso degli elementi naturali come base per la conservazione, la pianificazione, la progettazione e la gestione del paesaggio;
4 - i requisiti delle opere di architettura e di ingegneria in rapporto ai caratteri del paesaggio;
5 - le problematiche fisiche e tecnologiche che interferiscono con l'ambiente;
6 - le relazioni tra uomo e ambiente;
7 - la tutela, la conservazione e il restauro dei paesaggi storici;
8 - la rilevanza dell'architettura del paesaggio nei processi di progettazione e di pianificazione a livello regionale, nazionale e internazionale;
9 - i metodi di analisi preparatori alla progettazione del paesaggio e delle relazioni ambientali;
10 - i metodi e le tecniche di rappresentazione e comunicazione;
11 - i processi produttivi, normativi e gestionali funzionali all'attuazione dei piani e alla realizzazione dei progetti;
12 - la legislazione attinenti all'esercizio della professione del progettista del paesaggio.
Il percorso formativo intende tener conto della peculiarità della disciplina paesaggistica contemporanea per quanto riguarda la dimensione propriamente progettuale orientata a valorizzarne l'identità dei luoghi, gli aspetti più specificamente tecnici e tecnologici, gli obiettivi di qualità del paesaggio, i metodi ecologico-ambientali, le finalità sociali del progetto, i caratteri di sostenibilità ambientale, economica, sociale, tecnico-impiantistica, energetica e una visione contemporanea e dinamica degli aspetti ambientali. A tal fine l'offerta formativa ordinarria potrà essere integrata da attività di organizzazione, partecipazione e gestione di seminari e workshop a livello nazionale ed internazionale.

Requisiti di accesso:
L'iscrizione alla Laurea Magistrale è subordinata alla verifica dei requisiti e della preparazione personale dello studente. In sintesi, è necessario avere un titolo di studio universitario o titolo equipollente, nei settori dell'architettura del paesaggio, delle scienze architettoniche, delle scienze della pianificazione territoriale, urbanistica, ambientale e paesaggistica, delle scienze e tecnica dell'edilizia, delle scienze e tecniche agrarie e forestali (ivi compresa la progettazione e la pianificazione esperienze) e simili.

GPA minimo: 75/100

LM in Architettura-Rigenerazione urbana

Descrizione:
Il Corso di Laurea magistrale (CdLm) in Architettura - Rigenerazione urbana, in coerenza con gli obiettivi formativi qualificanti della classe LM-4, ha la finalità di fornire una risposta alla esigenza di un nuovo profilo di architetto inserito a pieno titolo, in termini culturali e professionali, e non meramente formali, nel contesto europeo, contesto in cui i temi della rigenerazione urbana svolgono, senza dubbio, un ruolo di particolare rilevanza, così come anche reso evidente a fronte delle principali questioni individuate nell’Agenda urbana europea e internazionale, nonché, più recentemente, anche nell’Agenda urbana nazionale in via di definizione.

Un architetto formato per indagare, configurare e sostenere processi di rigenerazione urbana, dedito al progetto come ricerca e come processo di sperimentazione continua; capace di fornire risposte adeguate ai processi di rigenerazione della città contemporanea a tutte le scale e in modo integrato, coniugando la complessità per restituire al progetto della città e dell’architettura contemporanei prospettive di equità sociale, di benessere e inclusione, di qualità ecologica, di sostenibilità storico-ambientale, di efficacia ed efficienza nell’uso delle risorse.

Una figura professionale portatrice di una competenza progettuale, tecnica e tecnologica in grado di gestire il carattere di emergenza dei fenomeni e l’intervento in territori, come quelli delle città italiane, fortemente connotati in termini di stratificazione e di fragilità delle diverse componenti, e tuttavia, al tempo stesso, rispondente alle linee di azione e agli indirizzi strategici del contesto e dell’Agenda urbana europea.

Requisiti di accesso:
Le modalità di ammissione alle Lauree magistrali prevedono la verifica del possesso dei requisiti curriculari previsti dall’Ordinamento e dell’adeguatezza della preparazione personale. Per accedere al CdLm è necessario:
- essere in possesso di una Laurea o di un Diploma universitario di durata triennale (DM 270/04, art. 6, comma 2), ovvero di altro titolo di studio conseguito all’estero, riconosciuto idoneo;
- aver adempiuto alle attività formative indispensabili corrispondenti al possesso dei 108 CFU definite nella tabella relativa alla Laurea in “Scienze dell’Architettura” L17;
- aver superato il test di ammissione obbligatorio per l’iscrizione a un CdL o CdLm a ciclo unico, con la finalizzazione diretta “alla formazione di architetto”, come definito annualmente dal Ministero a livello nazionale, con decreto, relativamente al n. di posti per le immatricolazioni degli studenti.

LM in Ingegneria delle Nanotecnologie

Descrizione:

Il Master in Ingegneria delle nanotecnologie ha lo scopo di fornire agli studenti una formazione scientifica e professionale avanzata, necessaria per entrare nel mercato del lavoro internazionale delle nanotecnologie. Durante i due anni del Master, gli studenti svilupperanno una gamma di competenze che dovrebbero permettere loro di affrontare problemi relativi all'analisi, allo sviluppo, alla simulazione e all'ottimizzazione di dispositivi, materiali e processi che richiedono l'uso di nanotecnologie, specialmente nelle aree di Ingegneria Industriale ed Elettronica. Il corso è finalizzato allo sviluppo di strumenti avanzati di ricerca e progettazione multiscala, nonché all'innovazione tecnologica all'interno delle diverse aree in cui le nanotecnologie possono essere applicate.

Il corso si concentra principalmente sulle seguenti competenze:

- Capacità di gestire e utilizzare micro e nanotecnologie per lo sviluppo di materiali, biotecnologie e processi applicabili alla realizzazione di nuovi micro e nano-dispositivi;
- Capacità di gestire progetti utilizzando metodi di simulazione a livello atomistico e nuovi micro / nano-dispositivi per specifiche applicazioni funzionali e multifunzionali;
- Capacità di gestire micro e nano-sistemi complessi;
- Capacità di affrontare i problemi legati al rischio e alla sicurezza riguardanti l'uso delle nanotecnologie.

Inoltre, il processo di apprendimento ha lo scopo di fornire ai futuri ingegneri delle nanotecnologie la capacità di integrare le conoscenze tecnico-scientifiche con competenze contestuali e orizzontali e competenze trasversali, compresi quelli strumenti comunicativi che sono considerati indispensabili per operare in un ambiente internazionale. Le abilità sopra descritte saranno raggiunte grazie a un'offerta educativa stimolante, focalizzata sull'approfondimento dei seguenti temi: tecniche di nanofabbricazione, processi di auto-assemblaggio di nanostrutture, ingegneria delle superfici, metodi di modellazione atomistica di nanostrutture, tecniche di caratterizzazione fino alla scala nanoscopica.

Gli studenti saranno inoltre introdotti a tecniche e metodi di analisi e progettazione di nuovi materiali e superfici micro / nanostrutturate, multifunzionali e intelligenti, finalizzati alla realizzazione di dispositivi fluidi, elettrici, elettronici, elettromagnetici, fotonic i ibridi nano e micro-mecanici, e allo sviluppo di microsistemi basati su flussi e reagenti finalizzati al trasporto, separazione, purificazione e amplificazione di composti cellulari e subcellulari, micro-sonde e materiali biocompatibili per il recupero e la riabilitazione di tessuti e organi.

Requisiti di accesso:

- Laurea triennale nei settori dell'Ingegneria Industriale e dell'Informatica.
- Buona padronanza della lingua italiana, dimostrata da una certificazione adeguata.

La valutazione sarà effettuata considerando il voto finale della laurea triennale, il cv e il portfolio sulle competenze e le attività nel campo dell’ingegneria, al fine di valutare e garantire che il candidato abbia le conoscenze di base necessarie per essere formato come futuro Ingegnere delle nanotecnologie. In particolare, per la valutazione delle applicazioni utilizzeremo i parametri equivalenti GPA / CGPA (Cumulative Grade Points Average) o GPA / CGPA.

Saranno ammessi direttamente solo i candidati con laurea triennale in Ingegneria e con i valori più alti [indicativamente, GPA / CGPA> = 16/20, 3.7 / 4, 90/100]; quelli con i valori più bassi [indicativamente, GPA / CGPA <2.7 / 4, 80/100, 13/20] saranno esclusi direttamente. Per tutti gli altri, ci sarà una commissione ad hoc (il comitato di ammissione) che effettuerà un'attenta valutazione dei contenuti dei CV presentati.

For more information: ingegneria_nanotecnologie lm53@uniroma1.it
LM in Ingegneria gestionale

Requisiti Accademici: come requisito minimo, un candidato deve avere una laurea (Bachelor’s Degree) in Ingegneria Gestionale o in aree scientifiche correlate. Requisiti linguistici: conoscenza della lingua inglese e conoscenza della lingua italiana (ci sono cinque esami obbligatori in lingua italiana, per un totale di 51 crediti su 120).

Elementi principali richiesti per l'ammissione: background generale in discipline scientifiche (tra cui Matematica ed Informatica), background specifico in: Accounting, Capital Budgeting, Operations Research, Supply Chain Management. Si prega di notare che gli studenti selezionati potranno essere invitati a sostenere un test online, al fine di valutare le loro competenze: il test includerà domande tecniche relative al background di cui sopra.

Voto di Laurea Minimo: 80/100

Conoscenza Minima della Lingua Italiana: Upper Intermediate (CEFR Level B2)

Qui i certificati considerati validi: https://www.linguaitaliana.esteri.it/lingua/corsi/certificazioni/ricerca.do
Gli studenti sprovvisti di almeno uno dei certificati di cui sopra saranno tenuti a superare un test di lingua a Roma.

LM in Management delle imprese

Descrizione: Il Corso di Studi (CdS) in LM- 77 Management delle imprese si propone di fornire conoscenze avanzate e competenze manageriali e imprenditoriali utili per affrontare in maniera efficace le problematiche delle imprese in una società in rapido cambiamento. Il percorso formativo è così strutturato:

- **Curriculum Business Management** (offerto in lingua inglese); **doppio titolo** (italo-tedesco, italo-statunitense, italo-russo); SRH Hochschule (Berlin); Northern Illinois University (Dekalb); Moscow State Institute of international relations (MGIMO); North-Caucasus Federal University (NCFU) - Istitute of Economics and Management (Stavropol)

- **Curriculum Marketing**

- **Curriculum General management e sostenibilità**

Per ulteriori informazioni visitare: https://corsidilaurea.uniroma1.it/ and for more specific information check here: https://web.uniroma1.it/dip_management/didattica/corsi-di-laurea-magistrale/management-delle-imprese-manimp

Requisiti di accesso:

- **Laurea di primo ciclo** (livello EQF 6: laurea triennale o equivalente) con adeguata preparazione accademica (complessivamente 72 CFU) in: Studi aziendali e management (minimo 18 CFU/ECTS o crediti/ore equivalenti)

  I restanti crediti devono appartenere ad almeno 2 delle seguenti aree:
  - Economia;
  - Matematica/Statistica;
  - Analisi quantitativa (ad es. Informatica);
  - Diritto

- **Rendimento accademico** espresso dalla media ponderata (CGPA) Per Studenti extra-UE residenti all'estero: 80%.

Conversione ed equivalenza di crediti e voti saranno stabiliti ad insindacabile giudizio della commissione di selezione.

- **Conoscenza della lingua italiana**: [link]

  uno dei seguenti certificate di lingua:
  - certificati di lingua italiana corrispondenti ai livelli del Consiglio europeo B2 emessi nell'ambito della Certificazione Lingua Italiana di Qualità (CLIQ);
  - diploma di istruzione secondaria di secondo grado di durata quinquennale o quadriennale conseguito presso le scuole italiane statali e paritarie all'estero;
  - certificato complementare al titolo finale di Scuola Media conseguito in Argentina, che attestano la frequenza di un corso di studi comprensivo dell'insegnamento, per almeno 5 anni, della lingua italiana, ai sensi della Legge n. 210 del 7.6.1999 (G.U. n. 152 dell’1.7.1999);
  - diploma di lingua e cultura italiana presso le Università per Stranieri di Perugia e di Siena;

In alternativa, i candidati extracomunitari che non risiedono in Italia, per potersi immatricolare ai corsi di studio devono superare una prova obbligatoria di lingua italiana. [link]

Le candidature saranno valutate solo se il titolo di studio e competenza linguistica corrispondono ai requisiti curriculari minimi sopra menzionati.

Curriculum vitae e esperienza lavorativa non sostituiscono i requisiti minimi, ma saranno valutati dalla Commissione di selezione ai fini della graduatoria finale

Per informazioni: internationalstudents-eco@uniroma1.it
LM in Scienze dello sviluppo e della cooperazione internazionale

Descrizione:
Il Corso di laurea magistrale interfacoltà in Scienze dello Sviluppo e della Cooperazione Internazionale punta a fornire un’elevata professionalità nell’analisi dei fattori istituzionali e culturali e nella programmazione e gestione delle specifiche iniziative di cooperazione, indirizzate alla crescita delle società in via di sviluppo. Il Corso, istituito dalle Facoltà di Scienze Politiche, Sociologia, Comunicazione, e di Lettere e Filosofia, offre conoscenze interdisciplinari e strumenti operativi per l’analisi e l'interpretazione dei contesti dei paesi emergenti e per la gestione di programmi e progetti per la pace e per la cooperazione internazionale allo sviluppo.

Fornisce altresì avanzate competenze necessarie per:
- l’ideazione, la redazione, l’attuazione e la direzione di programmi e progetti integrati di cooperazione allo sviluppo;
- l'applicazione dei principali metodi di monitoraggio e valutazione;
- l'utilizzo fluente, in forma scritta e orale, dell'inglese e una buona conoscenza della lingua francese, spagnola, con possibilità di accesso anche ad altre lingue;
- l'utilizzo degli strumenti per la comunicazione e la gestione dell'informazione.

Nel secondo anno il curriculum di studio si articola in due indirizzi altamente caratterizzanti, orientati a coniugare un elevato grado di conoscenza specialistica con un’adeguata formazione operativa: Indirizzo Socio-Politico-Economico; Indirizzo Economics for development.

magistralicoris@uniroma1.it
LM in Scienze e Tecnologie per la Conservazione dei Beni Culturali

Descrizione:
Il corso ha come obiettivo la formazione di esperti nel campo dell'archeometria e conservazione dei beni culturali (scienziati della conservazione), con competenze specialistiche nella caratterizzazione multi-analitica di una vasta gamma di materiali archeologici e del patrimonio culturale. Gli studenti applicheranno metodi scientifici e tecnologie avanzate nello studio della conservazione. I laureati raggiungeranno i seguenti obiettivi:

- Capacità di lavorare in un'area di ricerca con una forte connotazione multidisciplinare (tra Scienza e Scienze umane);
- Competenza nelle tecniche analitiche, metodi scientifici di indagine e interpretazione dei dati, finalizzati al recupero e alla conservazione del patrimonio culturale;
- Abilità avanzate nell'analisi delle interazioni tra il patrimonio culturale e il suo ambiente fisico-chimico;
- Conoscenza avanzata delle applicazioni archeometriche in diversi campi di interesse.

La natura multidisciplinare delle attività nel campo dei Beni Culturali rende necessario un percorso didattico che consenta di rispondere alle esigenze scientifiche e professionali dell'area e allo stesso tempo un nucleo di lezioni per completare la formazione umanistica e migliorare conoscenza in discipline di carattere generale. La formazione è completata da stage presso laboratori scientifici universitari o presso operatori pubblici e privati nel settore di interesse.

Requisiti di accesso:
Per accedere alla Laurea Magistrale in Scienze e Tecnologie per la Conservazione dei Beni Culturali è necessario essere in possesso di una laurea triennale o di un diploma universitario, o altro titolo idoneo conseguito all'estero.

Sono richieste conoscenze di base delle scienze matematiche, fisiche e naturali, dei materiali costitutivi e/o impiegati nel patrimonio culturale, delle discipline umanistiche ed economiche (museologia, storia del restauro e tecniche della produzione artistica, legislazione ed economia dei beni e delle attività culturali); è inoltre richiesta conoscenza relativa all'Information Technology.

L'ammissione si svolgerà in base alla verifica dei requisiti curriculari e un colloquio per tutti gli studenti, ovvero attraverso la procedura di preselezione online. Per accedere al programma di studio, gli studenti devono avere un livello B2 di conoscenza della lingua italiana. In assenza di una certificazione, il livello linguistico sarà accertato dalla Commissione di ammissione.
